Question 1

Question Type: MultipleChoice

The Avaya Equinox Client can send/receive video during a P2P call in Team Engagement deployment.

Which Avaya application must be deployed to enable Video in a P2P call?

Options:

A- System Manager

B- Session Manager

C- Avaya Aura Device Services (AADS)

D- Communication Manager

Answer:

D

Question 2

Question Type: MultipleChoice

Which Avaya Equinox Management (TE) component needs to be deployed as a Management Node in a large deployment with over 10,000 video endpoint registrations?

Options:

A- Conference Control (UCCS)

B- User Portal and Web Gateway

C- H.323 Gatekeeper

D- SIP B2BUA

Answer:

B

Question 3

Question Type: MultipleChoice

It is possible to provide the same configuration to an Avaya IX Workplace Client that will work both when it is connected to the external public Internet, and when it is connected via an internal corporate network.

Which statement describes the recommended technique used to do this?

Options:

A- the Client automatically selects a different Avaya Aura Device Services (AADS) profile when connected to a Public Internet Service Provider (ISP) based on an IP address subnet mapping table downloaded by Avaya Aura Device Services (AADS).

B- DNS mapping is configured in Avaya Aura Device Services (AADS) to return FQDNs rather than IP addresses; the Client resolves the FQDN to correct server address by DNS or local hosts file.

C- Avaya Aura Device Services (AADS) returns the configured list of all Public and Private IP address that the Client should attempt to connect to.

D- The Client must be statically provisioned with the list of server IP addresses that it should attempt to connect to (both private and public).

Answer:

B

Question 4

Question Type: **MultipleChoice**

To allow public access for Avaya IX Workplace for Web Clients, which two services must be configured in Avaya Session Border Controller for Enterprise (ASBCE)? (Choose two.)

Options:

A- SIP Trunk

B- Reverse Proxy

C- Application Relay

D- STUN/TURN Service

Answer:

B, C

Question 5

Question Type: MultipleChoice

When UDP is blocked by the Enterprise firewall, which feature of Avaya Session Border Controller for Enterprise (ASBCE) 7.2 allows sending Media via HTTP/s port 80/443?

Options:

A- Media Anchoring

B- Traversal Using Relay NAT (TURN)

C- Session Traversal Utilities for NAT (STUN)

D- Media Tunneling

Answer:

D

Question 6

Question Type: **MultipleChoice**

When a call is received from an Avaya IX Workplace for Web Client located outside the Enterprise in a Team Engagement (TE) deployment, which two functions are performed by Avaya Session Border Controller for Enterprise (ASBCE)? (Choose two.)

Options:

A- A configured STUN/TURN server relays WebRTC media from an Avaya IX Workplace for Web Client through to an Avaya Aura Media Server (AAMS).

B- A configured Reverse Proxy sends WebRTC signaling from an Avaya IX Workplace for Web Client through to the Avaya Aura Web Gateway (AAWG).

C- A configured STUN/TURN server converts WebRTC media to traditional VOIP SIP media.

D- A configured Reverse Proxy converts WebRTC signaling into SIP Signaling and pass it to Session Manager (SM).

E- Relay SIP messages sent from an Equinox for Web client

Answer:

B, E

Question 7

Question Type: MultipleChoice

Which three benefits can Avaya Aura Device Services (AADS) provide to Avaya IX Workplace users? (Choose three.)

Options:

A- Dynamic Configuration Service

B- Instant Messaging

C- Enterprise Login

D- Web Deployment Service

E- Video Conference Service

Answer:

A, B, D

Question 8

Question Type: MultipleChoice
