Question 1

Question Type: MultipleChoice

You are investigating a slow-performing expression rule and want to analyze this rule's historical performance.

Which performance log should you look at to see the mean evaluation time of this rule every hour?

Options:

A- expressions_details.csv
B- expressions_metrics.csv
C- expressions_summary.csv
D- expressions_trace.csv

Answer:

A

Question 2

Question Type: MultipleChoice

You need to find a list of expression rules that are causing performance issues, or have caused performance issues in the last 30days.

What should you do?

Options:

A- Use the Monitoring tab to find rules with a low completion percentage.
B- Access the Rule Performance tab in the Administration Console.
C- Inspect the application server log.
D- Observe the runtime of all test cases.

Answer:

B

Question 3

Question Type: MultipleChoice

You are troubleshooting slow response times on a SAIL interface.

What are two potential causes of the performance issues? (Choose two.)

Options:

A- Multiple rule inputs
B- Multiple a!save operations
C- Configuration of refresh variables
D- Stacked button layout

Answer:

B, C

Question 4

Question Type: MultipleChoice

You are creating an ERD that models the data for a college and includes a Many-to-Many relationship, Student-to-Class, where a student can be enrolled in multiple classes, and a class can enroll multiple students.

How can you handle this relationship so that it can be supported in Appian and remain in at least First Normal Form? (Choose the best answer.)

Options:

A- A joining table can be used to hold instances of Student/Class relationships.
B- The Student table should have a Class field to hold an array of Class IDs.
C- The Class table should have a Student field to hold an array of Student IDs.
D- It cannot be done, because Appian CDTs cannot handle Many-to Many relationships.

Answer:

A

Question 5

Question Type: MultipleChoice

What is the lowest permission required on the data store in order to query, write, and delete data?

Options:

A- Manager
B- Administrator
C- Viewer
D- Editor

Answer:

C

Question 6

Question Type: MultipleChoice

You are troubleshooting a process model instance with an error in a node.

Which two options will allow you to obtain more information about the error? (Choose two.)

Options:

A- Open the process model from the process instance.
B- View the Process Details dialog.
C- View the process model properties.
D- View the properties dialog of the affected node.

Answer:

B, D

Question 7

Question Type: MultipleChoice

You are required to display information for pending tasks for each individual in an application. There will be tasks for a single specific application.

Which context type should you choose for the Task Report Type?

Options:

A- Tasks by process model
B- Tasks attributed to user
C- Tasks by process
D- Tasks assigned to a group
