Question 1

Question Type: MultipleChoice

How can you tell if GoldenGate has been configured for batch processing?

Options:

A- TheSPECIALRUNparameter is in the Replicat parameter file.
B- Replicat is started with theINITIALLOADtask.
C- There is a dedicated GoldenGate process calledSPECIALRUN.
D- TheSPECIALRUNparameter is in theGLOBALSparameter file.

Answer:

B

Question 2

Question Type: MultipleChoice

Which three are required to correctly configure an OGG?

Options:

A- A maximum file size
B- An extract process
C- A trail file identifier
D- Designation as local or remote

Answer:

B, C, D

Question 3

Question Type: MultipleChoice

You want to generate an extract file or trail in a non-GoldenGate canonical format like those

used in the Initial Load file-to--database utility. How should you configure GoldenGate in order to accomplish this?

Options:

A- Configure Replicat with theFORMATASCII SQLLOADER OPTION.
B- Configure Extract with theFORMATSQL SQLLOADER OPTION.
C- Configure Extract with theFORMATASCII SQLLOADER OPTION.
D- Configure Replicat with theFORMATXML OPTION.

Answer:

C

Question 4

Question Type: MultipleChoice

Which is an incorrect syntax for connecting to a source or target database by an Extract or Replicat?

Options:

A- TARGETDB TargetDSN USERID sampleID PASSWORD samplepword
B- SOURCEDB SourceDSN
C- SOURCEDB sampleDB USERID sampleID PASSWORD samplepword
D- TARGETDB sampleID samplepword

Answer:

B

Question 5

Question Type: MultipleChoice

Which three describe a valid OGG Event Action?

Options:

A- Stop the process
B- Write a checkpoint before and/or after writing the record to the trail.
C- Run a shell command
D- Purge old trail files

Answer:

A, B, C

Explanation:

In reference guide, page 312,Syntax EVENTACTIONS ([STOP| ABORT | FORCESTOP][IGNORE [TRANSACTION [INCLUDEVENT]][DISCARD][LOG [INFO | WARNING]][REPORT][ROLLOVER][SHELL<command>][TRACE <trace file> [TRANSACTION] [PURGE | APPEND]][CHECKPOINT[BEFORE | AFTER | BOTH]][, ...])

Question 6

Question Type: MultipleChoice

What is the key purpose of GoldenGate trail files?

Options:

A- They are a persistent storage area for captured transactions.
B- They are configuration files for the GoldenGate processes.
C- They are checkpoint files for the GoldenGate processes.
D- They are database auditing logs where GoldenGate captures changes.

Answer:

C

Question 7

Question Type: MultipleChoice

Which statement regarding the GoldenGate Data Pump is incorrect?

Options:

A- Data Pump is a separate process.
B- Data Pump can be used to pump trail records to multiple locations.
C- Data Pump has distance limitations.
D- Data Pump uses TCP/IP to route the trail records.

Answer:

A

Question 8

Question Type: MultipleChoice

Your Extract process, which is using an Oracle database, has stopped with uncommitted transactions. How should you guarantee an efficient recovery after Extract has stopped?

Options:

A- Use theFORCETRANSandPURGEORPHANEDTRANSACTIONSparameters to control the bounded recovery feature of the general Extract checkpointing facility.
B- Use theWARNLONGTRANSparameter to control the bounded recovery feature of the general Extractcheckpointing facility.
C- Use theBRparameter to control the bounded recovery feature of the general Extract checkpointing facility.
D- Use thePURGEORPHANEDTRANSACTIONSparameter to control the bounded recovery feature of the general Extract checkpointing facility.

Answer:

C

Question 9

Question Type: MultipleChoice

Identify two correct statements regarding GoldenGate supported features.

Options:

A- GoldenGate supports network encryption and compression.
B- GoldenGate supports DML and DDL replication for all supported databases.
C- GoldenGate for Oracle supports Exadata Hybrid Columnar Compression as a source.
D- GoldenGate for SQLServer supports only SQLServer Standard Edition as a source.

Answer:

A, C

Question 10

Question Type: MultipleChoice

By default which type of operations are captured by extract?

Options:

A- Inserts, updates, deletes, and table operations such as CREATE TABLE
B- Inserts, compresses, and updates
C- Inserts, updates, deletes, and table operations such as ADD COLUMN
D- Inserts only
E- Inserts, updates, and deletes

Answer:

E

Question 11

Question Type: MultipleChoice

What is the function of the GoldenGate JAgent?

Options:

A- It performs connections via JDBC to run the Veridata comparisons.
B- It enables communication between GoldenGate and Monitor, and Enterprise Manager Agent.
C- It reads the database transaction logs.
D- It integrates GoldenGate with Oracle Data Integrator.

Answer:

B
