Question 1

Question Type: MultipleChoice

The UX team wants to display a search box in the site header region on all pages except for the search page itself The search page path is "/search."

What is the simplest way to add the search form to the header region, and exclude it from the search page"

Options:

- A) In the Block layout settings, add the search form block to the Header section and set the block to be excluded from the page '/search.'
- B) Add the search block to all pages, and hide it from '/search' using css
- C) Check the 'show search' option in the site branding block, and set the block to be excluded from the page '/search.'
- D) Write a custom search View with a block layout Set a filter in the View to exclude the path '/search.'

Answer:

D

Question 2

Question Type: MultipleChoice

Your company website has a form "Contact Us/" through which users can submit questions or feedback to the company This form uses the site-wide contact form that comes with Drupal 8

The News department within your company has requested their own contact form so that site visitors can specify additional information about a potential story

How can you build the News department their own contact form with an additional field, using only Drupal core modules"

Options:

- A)** Update the existing contact form with a checkbox ('Send message to News team'): a 'Story Information' field, and conditional fields to route the message accordingly
- B)** This request is best handled with a contributed module such as Webform
- C)** Under Structure > Contact Forms, add the News department's email address to the recipients of the existing contact form, and a new field 'Story information '
- D)** Under Structure > Contact Forms, add a new contact form with the News department's email address as the recipient, and a new field: 'Story information.'

Answer:

D
