Question 1

Question Type: MultipleChoice

Which feature is supported with an In-Service Software Upgrade on a Cisco Nexus 9000 Series Switch?

Options:

- A- configuration changes during an upgrade
- B- nondisruptive upgrades via nonstop forwarding
- C- zero downtime downgrades via dual supervisor modules
- D- upgrades to individual modules and line cards

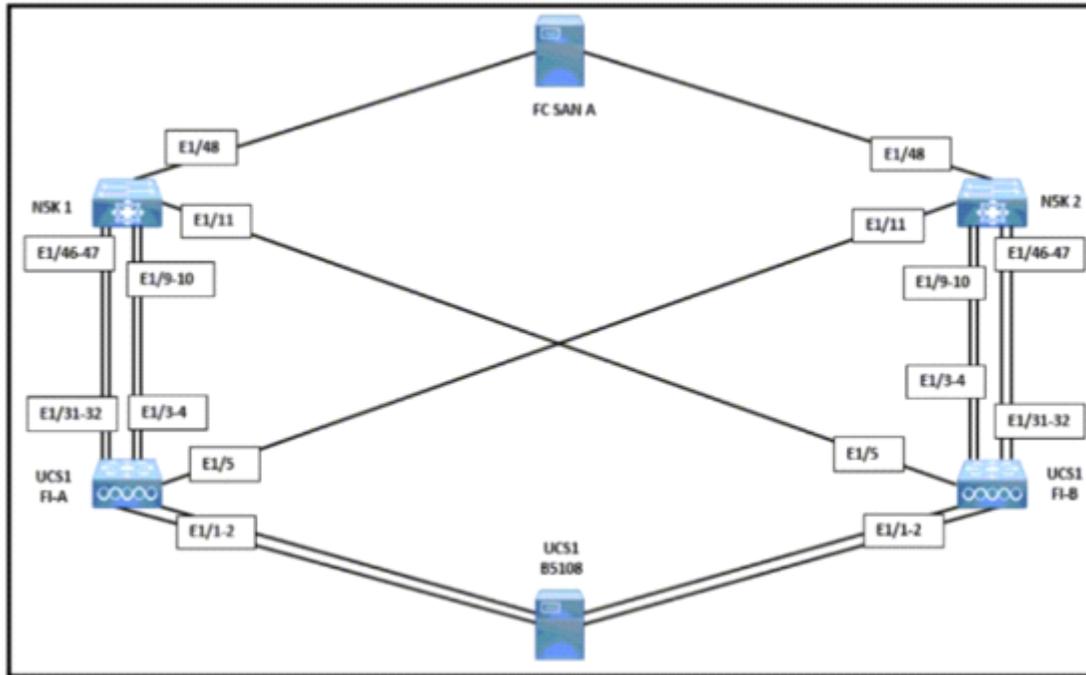

Answer:

B

Question 2

Question Type: MultipleChoice

Refer to the exhibit.

A network engineer must configure port E1/31- 32 to forward only storage server traffic of VLAN 200 on Cisco fabric interconnects A and B. Port E1/31- 32 is not reserved for any other traffic. Which port type must be configured to accomplish this goal?

Options:

A- unified uplink

- B- uplink
- C- FCoE uplink
- D- FCoE storage

Answer:

B

Question 3

Question Type: MultipleChoice

Refer to the exhibit. A network engineer is configuring the Smart Call Home feature on a Cisco Nexus Series Switch. An email must be generated that contains the last 100 lines of the log every time a new piece of hardware is inserted into the chassis. Which command must be added to the configuration to receive the email?

Options:

- A- alert-group Linecard-Hardware user-def-cmd show logging last 100
- B- destination-profile Operations alert-group Inventory

- C- destination-profile Operations message-level 2
- D- alert-group Operations user-def-cmd show logging last 100

Answer:

A

Question 4

Question Type: MultipleChoice

Refer to the exhibit During a vPC peer switch reload, there is packet loss between the server and the router Which action must be taken to prevent this behavior during future reloads?

Options:

- A- Set the routed uplink ports of the Cisco Nexus peers as orphans.
- B- Increase the vPC delay restore timer.
- C- Decrease the OSPF hello and dead interval timers.
- D- Disable vPC ARP synchronize on the vPC peers.

Answer:

B

Question 5

Question Type: MultipleChoice

Refer to the exhibit. Which information must be added to the script to complete the POAP operation on the Cisco Nexus 9000 Series Switch?

- API token d41d8cd98f00b40960045298ecf8427e of the Cisco APIC.
- MD5SUM 41d8cd98f00b204e9800998ecf8427e of the Python code.
- API token d41d8cd98f00b77986331998ecf8427e of the Cisco Nexus 9000 Series Switch.
- MD5SUM d41d8cd98f00b20449800998ecf8427e of the script file.

Options:

A- Option A

B- Option B

C- Option C

D- Option D

Answer:

D

Question 6

Question Type: MultipleChoice

An engineer must implement the FCoE on the Cisco Nexus 9000 Series Switch-based infrastructure. The deployment will contain dual-homed fabric extenders and must support jumbo frames with port channels. Which two sets of actions complete the configuration? (Choose two.)

- Configure the interface with mtu 9516.
Disable the feature NPIV.
- Create a virtual Fibre Channel interface.
Bind vFC to physical interface.
- Create a FCoE switch profile.
Enable config sync.
- Create a dedicated VSAN for FEX.
Bind VSAN to FEX uplinks.
- Execute fcoe enable-fex.
Configure FEX uplinks with mtu 9216.

Options:

- A-** Option A
- B-** Option B
- C-** Option C
- D-** Option D
- E-** Option E

Answer:

D, E
