Question 1

Which of the following statements is NOT correct about the communication between two NSGs in different branch offices?

Options:

A- These two NSGs exchange OpenFlow-TLS with their controller to establish the tunnel for overlay traffic.

B- These two NSGs must be managed by the same VSD/VSD HA cluster.

C- The overlay tunnels established between the NSGs must be VXLAN encapsulation.

D- The overlay tunnels are established during bootstrapping.

Answer:

C

Question 2

Which of the following is NOT defined in the NSG infrastructure G/W profile?

Options:

A- Identify the VSD proxy

B- Enable two-factor installer authentication

C- Port speed and mode

D- NTP, stats, syslog server

Answer:

B

Question 3

Question Type: MultipleChoice

Which of the following is TRUE about NSG dual uplink?

A- It only provides redundancy for data traffic.

B- Traffic is load balanced between primary and secondary links.

C- One primary VSC is selected on each uplink.

D- Both uplinks can be connected to the same network or to two different networks.

Answer:

B

Question 4

Question Type: MultipleChoice

Which of the following statements about the NSG vports is TRUE?

Options:

A- The NSG responds to DHCP requests on a host vport by default.

B- A host MAC address is dynamically leaned on a host vport.

C- A host vport allows multiple devices to be connected through a switch.

D- IP address assignment is handled by the NSG for a host on a host vport.

Answer:

D

Question 5

Question Type: MultipleChoice

Which one of the following statements is correct regarding bridge vPorts in the VNS solution?

Options:

A- A DHCP pool can be configured on a subnet connected to an NSG bridge vPort, the NSG then becomes the DHCP server.

B- VSD is in charge of the IP address assignment to the devices behind the NSG vPort.

C- There must be more than one device behind the bridge vPort.

D- The static IP to MAC mapping configuration is not on the bridge vPort.

Question 6

Question Type: MultipleChoice

Which of the following is FALSE regarding VNS bootstrapping?

Options:

A- The bootstrapping configuration templates on VSD ensures NSG configuration conformance.

B- NSG is ready for dispatch without prior configuration.

C- It solves the problem of site CPE activation without having to send a skilled technician on site.

D- NSG exchanges the plain text proprietary bootstrap protocol with VSD.

Answer:

D

Question 7

What type of NAT is used so that any external host can send to iAddr: iPort by sending traffic to eAddr: ePort? (i=internal, e=external)

Options:

A- Full-cone NAT

B- Address-restricted NAT

C- Port-restricted NAT

D- Symmetric NAT

Answer:

A
