Question 1

Question Type: MultipleChoice

You are creating an expression rule that will be reused throughout your environment.

What are two benefits of including meaningful test cases when creating a new expression rule? (Choose two.)

Options:

- A- Speed up unit, regression, and exploratory testing.
- B- Improve the appearance of the code.
- C- Improve performance.
- D- Increase code quality.

Answer:

A, D

Question 2

Question Type: MultipleChoice

You need to build a QC review process for a factory that allows a technician to review each production line on a regular basis.

A QC technician has 30minutes to complete their review, after which time the review will expire and be marked as a "missed review." If this, occurs, a supervisor should be notified via email and the review data should not be saved. Additional requirements are as follows:

The user should be able to save a draft of their review before submission, and come back to work on it later.

Once submitted, the review data should be saved to the database.

Which option needs to be implemented to meet the requirements?

Options:

- A-** An exception timer that skips the QC review task after 30minutes, which flows to a Send Email node configured to notify a supervisor
- B-** The task configured as a quick task
- C-** A send message event which sends an email after 30minutes to the supervisor
- D-** An escalation that sends an email after 30minutes to the supervisor

Answer:

A

Question 3

Question Type: MultipleChoice

Which two statements about the a!queryEntity() function are true? (Choose two.)

Options:

- A-** The queries defined using the query parameter are not limited in how long they wait to return results.
- B-** The queries defined using the query parameter return a constrained subset of matching data records by default.
- C-** The entity value must be given as a constant of type Data Store Entity.
- D-** Setting the fetchTotalCount parameter to False can improve the performance of the rule.

Answer:

C, D

Question 4

Question Type: MultipleChoice
