# Question 1

---

Question Type: MultipleChoice

---

Your company manufactures materials whose characteristics differ for each manufacturing process.

Which application do you have to use in SAP S/4HANA Cloud Private Edition to be able to track use this information in all areas of logistics?

Options:

- A- Process order management
- B- Engineering change management
- C- Quality management
- D- Batch management

Answer:

D

# Question 2

---

Question Type: MultipleChoice

---

In documentation for MRP in Advanced Planning you read that new orders are created through infinite planning. What does this mean for the capacity requirements of a new order?

Options:

- A- MRP assigns the capacity requirements automatically after the last scheduled operation for each work center.
- B- MRP creates the capacity requirements without considering existing load on the work centers.
- C- MRP creates the capacity requirements at the earliest possible time.
- D- MRP assigns the capacity requirements automatically to work centers with the earliest available capacity.

Answer:

A

## Question 3

---

Question Type: MultipleChoice

---

How can you achieve a feasible production plan in case of capacity constraints? Note: There are 3 correct answers to this question.

Options:

- A- Execute an infinite production planning run for the critical resources.
- B- Reduce the planning time interval.
- C- Determine a time period with available capacity on the planning board.
- D- Increase the capacity supply in a timephased interval.
- E- Form optimum sequences to reduce setup times.

Answer:

C, D, E

## Question 4

---

Question Type: MultipleChoice

---

You have a scheduling agreement with a vendor. You want classic MRP to automatically create schedule lines in case of material shortage. What must you do?

Note: There are 2 correct answers to this question.

Options:

- A- Set the creation indicator for purchase requisitions on the initial screen of the MRP run.
- B- Add the agreement to the source list mark it for MRP relevance.
- C- Set the creation indicator for delivery schedule lines on the initial screen of the MRP run.
- D- Add the agreement to the quota arrangement mark it for MRP relevance.

Answer:

B, C

## Question 5

---

Question Type: MultipleChoice

---

Your project uses process orders for the production of liquid chemicals.

What can you define to ensure that production flow only happens in suitable physically connected tanks? Note: There are 2 correct answers to this question.

Options:

- A- Resource hierarchy
- B- Resource selection
- C- Resource matrix
- D- Resource network

Answer:

B, D

## Question 6

---

Question Type: MultipleChoice

---

How can you support a GMP (Good Manufacturing Practice) compliant production process? Note: There are 3 correct answers to this question.

Options:

- A- Digital signature
- B- Approved resources
- C- Recipe approval
- D- GMPcompliant flag
- E- Batch record

Answer:

A, C, E

## Question 7

---

Question Type: MultipleChoice

---

What time element of midpoint scheduled operations can be reduced by reduction strategy settings while dispatching? Note: There are 2 correct answers to this question.

Options:

---

- A- Queue time
- B- Teardown time
- C- Move time
- D- Setup time

Answer:

---

A, C

## Question 8

---

Question Type: MultipleChoice

---

You want to insert an operation at a certain time on a work center in the graphical planning table. The planning direction is forward. The desired dispatching time coincides with an operation that has previously been dispatched.

How does the insertion take place?

Options:

---

- A- The previously dispatched operation stays as is; the new operation is inserted before the dispatched operation.
- B- The previously dispatched operation stays as is; the new operation is inserted after the dispatched operation.
- C- The new operation is inserted at the desired time; the previously dispatched operation is moved forward.
- D- The new operation is inserted at the desired time; the previously dispatched operation is moved backward.

Answer:

---

D

## Question 9

---

Question Type: MultipleChoice

---

What are the options if the Dispatched operation status is set for a production order operation?  
Note: There are 2 correct answers to this question.

Options:

---

- A- You can reschedule the operation using lead time scheduling.
- B- You can reschedule the operation using infinite scheduling in a planning table.
- C- You can reschedule the operation using finite scheduling in a planning table.
- D- You can reschedule the operation in the Manage Work Center Capacity app.

Answer:

---

C, D

## Question 10

---

Question Type: MultipleChoice

---

Which actions does the system perform by default when you save a confirmation for a finished product in repetitive manufacturing? Note: There are 3 correct answers to this question.

Options:

---

- A- Post the goods receipt for the finished product.
- B- Reduce run schedule quantities.
- C- Post production costs to the planned order.
- D- Update statistics for the Business Information Warehouse.
- E- Create associated capacity requirements.

Answer:

---

B, C, E

## Question 11

---

Question Type: MultipleChoice

---

Your quality department detects a deviation in a raw material batch. Unfortunately this batch has already been used in production. How can you identify all affected finished goods stocks?

Note: There are 2 correct answers to this question.

Options:

- A- Use batch determination.
- B- Use the Batch Information Cockpit.
- C- Use the batch whereused list.
- D- Use batch derivation.

Answer:

---

B, C
