Question 1

Question Type: MultipleChoice

In the Cloud RAN architecture, which of the following network element functions implements cloud deployment? (single-choice question, 6 points)

Options:

A- CU

B- AAU

C- DU

D- BBU

Answer:

A

Question 2

Question Type: MultipleChoice

Which of the following descriptions about 5G NSA networking is correct?

Options:

- A-** Option 3 is recommended for Option 3/3a/3x networking because it does not need to transform the existing LTE network
- B-** Option 3, 7, and 4 have different anchor points on the signaling plane. The radio is in LTE, eLTE, and NR, respectively; the core network is in EPC+, EPC+, and 5GC.
- C-** Option4 networking, suitable for the initial stage of network construction, LTE coverage is relatively weak.
- D-** Option3a/7a are both EPC offloading. The advantage is that they can be offloaded for different services, but the disadvantage is that EPC cannot be offloaded according to the wireless link status.

Answer:

D

Question 3

Question Type: MultipleChoice

Which of the following statements is false about the advantages of MEC? (single-choice question, 6 points)

Options:

- A-** The MEC server deployed at the edge of the mobile network can offload the traffic data locally, thereby greatly reducing the bandwidth requirements of the transmission network and the core network.
- B-** Improve energy efficiency and achieve green communication
- C-** Improve the user experience peak rate
- D-** MEC 'sinks' computing and storage capabilities to the edge of the network to reduce communication latency.

Answer:

C

Question 4

Question Type: MultipleChoice

Which of the following options is not the main application scenario of mmWave? (single-choice question, 6 points)

Options:

- A-** Wide coverage

- B- Self-backhaul, there is a station when there is electricity
- C- Household Broad Access
- D- Capacity increase

Answer:

A

Question 5

Question Type: MultipleChoice

The millimeter wave frequency band is the most mature frequency band in the 5G industry chain, and will become the main working frequency band of 5G in the future. (True or False, 6 points)

Options:

- A- True
- B- False

Answer:

B

Question 6

Question Type: MultipleChoice

After applying MEC, local storage and real-time analysis of high-definition surveillance video in the park can save transmission. (True or False, 6 points)

Options:

A- True

B- False

Answer:

A
