## Question 7

---

**Question Type:** MultipleChoice

---

Which of the following statements about route tables is false?

### Options:

---

- A-** You cannot add custom routes to a route table
- B-** When you create a VPC, the system automatically creates a default route table, which enables internal communication within the VPC
- C-** A route table contains a set of rules, called routes, that are used to control where inbound and outbound subnet traffic is forwarded to in a VPC
- D-** If you do not need to explicitly control how each subnet routes inbound and outbound traffic, you can use the default route table and do not need to configure custom routes

### Answer:

---

A
