Question 1

Question Type: MultipleChoice

You are asked to design an automated vulnerability scanner that can actively check to see which ports are open and report on the findings. Which Juniper Networks product would you use in this scenario?

Options:

- A- Security Director
- B- Log Director
- C- Policy Enforcer
- D- JSA

Answer:

C

Question 2

Question Type: MultipleChoice

You must implement a security solution that uses a central database to authenticate devices without EAP-M05 based on their network interface address. Which solution will accomplish this task'?

Options:

- A- static MAC bypass
- B- MAC RADIUS
- C- 802.1X single secure
- D- 802.1X multiple

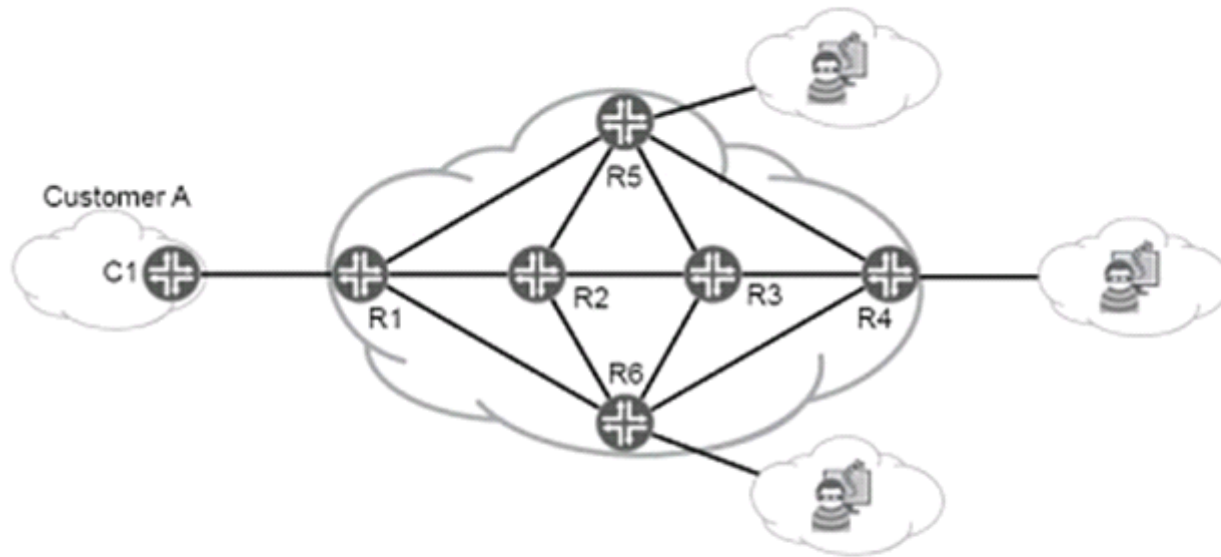

Answer:

C

Question 3

Question Type: MultipleChoice

Refer to the Exhibit.

You are asked to provide a proposal for security elements in the service provider network shown in the exhibit. You must provide DDoS protection for Customer A from potential upstream attackers.

Which statements correct in this scenario?

Options:

- A-** You should implement DDoS protection to drop offending traffic on the edge devices closest to the destination of the attack.
- B-** You should implement DDoS protection to drop offending traffic on the edge devices closest to the source of the attack.
- C-** You should implement DDoS protection to drop offending traffic on the core devices.
- D-** You should implement DDoS protection to drop offending traffic on the customer edge device.

Answer:

C

Question 4

Question Type: MultipleChoice

You are designing a security solution for an existing data center. All traffic must be secured using SRX Series devices, however, you are unable to change the existing IP addressing scheme. Which firewall deployment method satisfies this requirement?

Options:

- A-** transparent deployment

- B- two-arm deployment
- C- one-arm deployment
- D- inline deployment

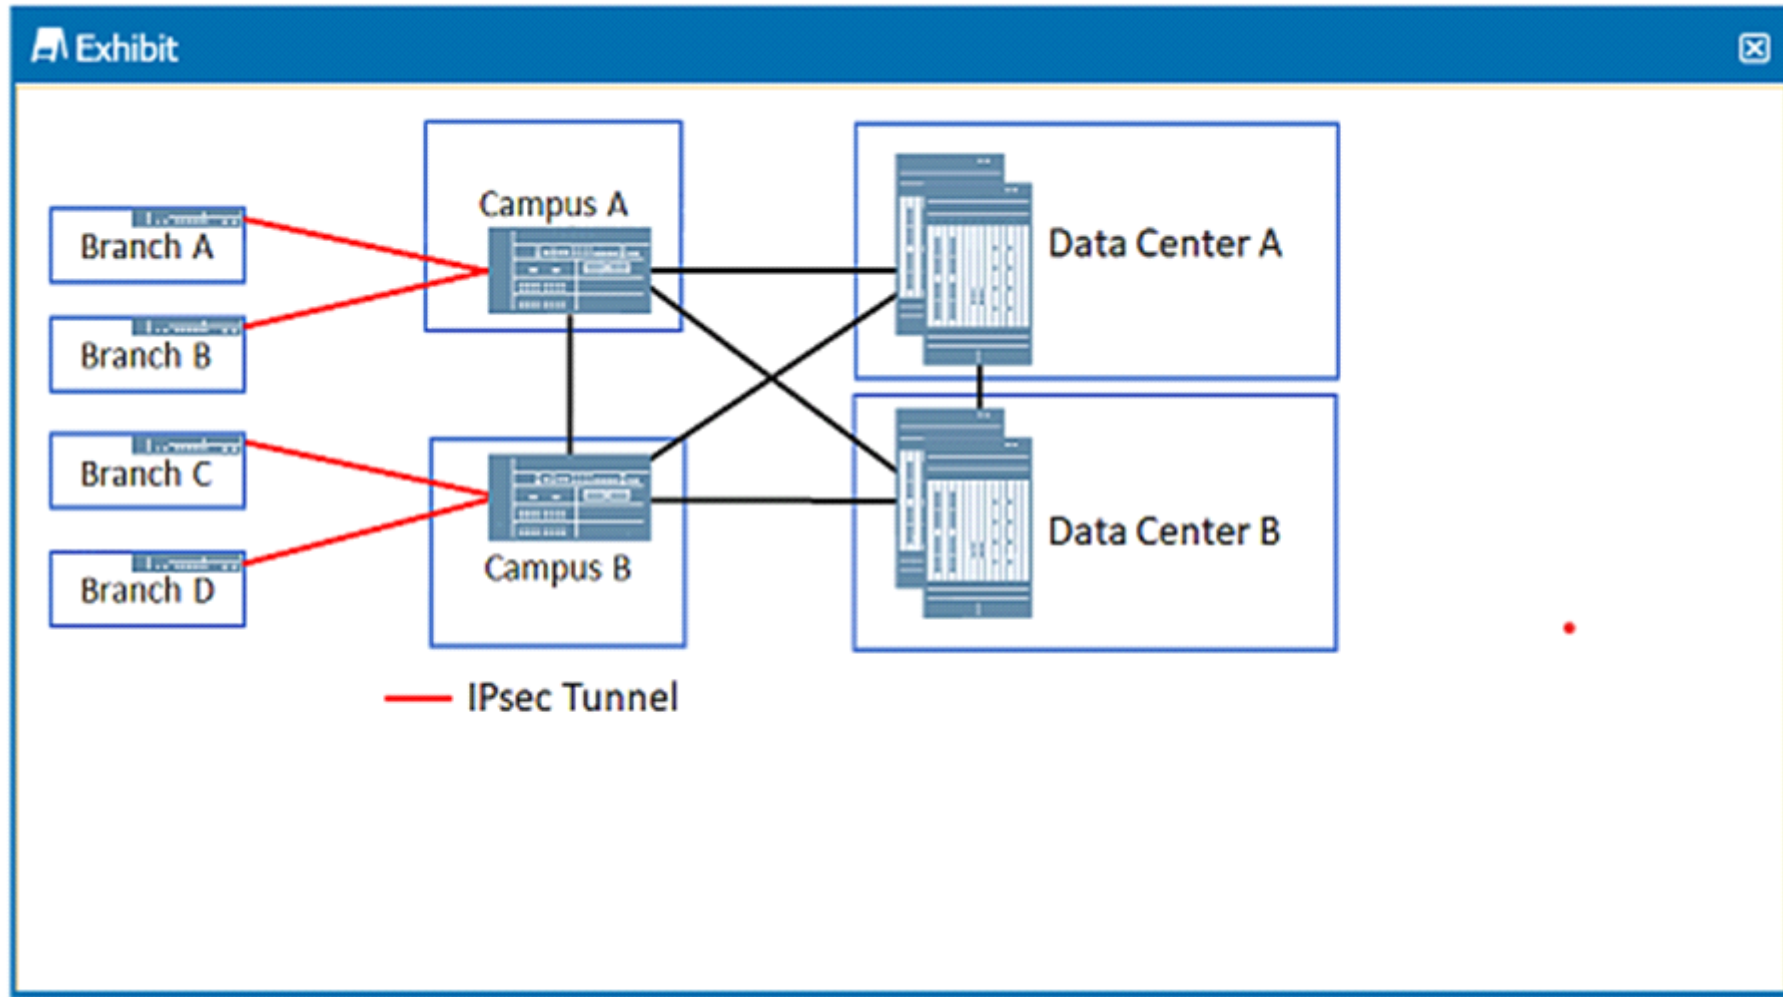

Answer:

A

Question 5

Question Type: MultipleChoice

Exhibit.

In the 3-tier VPN design shown in the exhibit, which function are the Campus A and Campus B SRX Series devices performing?

Options:

- A- Internet security gateway
- B- data center firewall
- C- WAN aggregation
- D- VPN bridging

Answer:

A

Question 6

Question Type: MultipleChoice

Which two steps should be included in your security design process? (Choose two)

Options:

- A- Define an overall routing strategy
- B- identify external attackers
- C- Identify permitted communications

D- Identify security requirements for the customer's organization

Answer:

B, C

Question 7

Question Type: MultipleChoice

Physical security devices are "blind" to which type of traffic?

Options:

A- bare metal server to VM

B- private VLAN

C- intra-server traffic

D- management

Answer:

B
