Question 1

The monitor traffic interface command is being used to capture the packets destined to and the from the SRX Series device.

In this scenario, which two statements related to the feature are true? (Choose two.)

Options:

A- This feature does not capture transit traffic.

B- This feature captures ICMP traffic to and from the SRX Series device.

C- This feature is supported on high-end SRX Series devices only.

D- This feature is supported on both branch and high-end SRX Series devices.

Answer:

A, D

Explanation:

https://forums.juniper.net/t5/Ethernet-Switching/monitor-traffic-interface/td-p/462528

Question 2

You opened a support ticket with JTAC for your Juniper ATP appliance. JTAC asks you to set up access to the device

using the reverse SSH connection.Which three setting must be configured to satisfy this request? (Choose three.)

Options:

A- Enable JTAC remote access

B- Create a temporary root account.

C- Enable a JATP support account.

D- Create a temporary admin account.

E- Enable remote support.

Answer:

C, D, E

Question 3

Question Type: **MultipleChoice**

Exhibit.

```
[edit security nat]
user@host# show
source {
  pool servers {
    address {
      198.51.100.240/32 to 198.51.100.254/32;
    }
    address-persistent subscriber ipv6-prefix-length 64;
  }
}
rule-set RS1 {
  from zone trust;
  to zone untrust;
    rule R1 {
      match {
        source-address 2001:db8::/32;
        destination-address 198.51.100.198/32;
      }
      then {
        source-nat {
          pool {
            servers;
          }
```

Referring to the exhibit, which two statements are true? (Choose two.)

Options:

A- The configured solution allows IPv6 to IPv4 translation.

B- The configured solution allows IPv4 to IPv6 translation.

C- The IPv6 address is invalid.

D- External hosts cannot initiate contact.

Answer:

A, C

Question 4

Question Type: MultipleChoice

According to the log shown in the exhibit, you notice the IPsec session is not establishing.

What is the reason for this behavior?

Options:

A- Mismatched proxy ID

B- Mismatched peer ID

C- Mismatched preshared key

D- Incorrect peer address.

Answer:

B

Explanation:

https://www.juniper.net/documentation/en_US/release-independent/nce/topics/example/policy-based-vpn-using-j-series-srxseries-device-configuring.html

Question 5

Question Type: **MultipleChoice**

Your organization has multiple Active Directory domain to control user access. You must ensure that security polices are passing traffic based upon the user's access rights.

What would you use to assist your SRX series devices to accomplish this task?

Options:

A- JIMS

B- Junos Space

C- JSA

D- JATP Appliance

Answer:

A

Explanation:

https://www.juniper.net/documentation/en_US/junos/topics/topic-map/security-user-auth-configure-jims.html

Question 6

Question Type: **MultipleChoice**

Exhibit.

```
user@host# show security idp-policy my-policy rulebase-ips
rule 1 {
    match {
        attacks {
            custom-attacks my-signature;
        }
    }
    then {
        action {
            no-action;
        }
    }
}
rule 2 {
    match {
        attacks {
            custom-attacks my-signature;
        }
    }
    then {
        action {
            ignore-connection;
        }
    }
}
rule 3 {
    match {
        attacks {
            custom-attacks my-signature;
        }
    }
```

A hub member of an ADVPN is not functioning correctly.

Referring the exhibit, which action should you take to solve the problem?

Question 7

Question Type: **MultipleChoice**

Which two log format types are supported by the JATP appliance? (Choose two.)

Options:

A- YAML

B- XML

C- CSV

D- YANG

Answer:

B, C

Explanation:

https://www.juniper.net/documentation/en_US/release-independent/jatp/topics/topic-map/jatp-custom-log-ingestion.html

Question 8

You have noticed a high number of TCP-based attacks directed toward your primary edge device. You are asked to

configure the IDP feature on your SRX Series device to block this attack.

Which two IDP attack objects would you configure to solve this problem? (Choose two.)

Options:

A- Network

B- Signature

C- Protocol anomaly

D- host

Answer:

B, C

Question 9

Question Type: **MultipleChoice**

You have designed the firewall filter shown in the exhibit to limit SSH control traffic to yours SRX Series device without affecting other traffic.

Which two statement are true in this scenario? (Choose two.)

Options:

A- The filter should be applied as an output filter on the loopback interface.

B- Applying the filter will achieve the desired result.

C- Applying the filter will not achieve the desired result.

D- The filter should be applied as an input filter on the loopback interface.

Answer:

C, D

Explanation:

https://www.juniper.net/documentation//en_US/junos/topics/concept/firewall-filter-ex-series-evaluation-understanding.html
