# Question 1

---

**Question Type:** MultipleChoice

---

A company uses cost groups to track calculated costs of items preassembled by vendors.

The company needs to analyze service costs for each vendor's preassembled items.

You need to assign the cost group type to the preassembled items.

Which costs should you assign?

## Options:

---

**A-** Direct material

**B-** Indirect

**C-** Direct manufacturing

**D-** Direct outsourcing

## Answer:

---

A

## Explanation:

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/cost-management/cost-groups>

## Question 2

---

### Question Type: MultipleChoice

---

You are using the manufacturing execution module in Dynamics 365 Supply Chain Management.

License plate labels must be printed for products in the Report as finished step.

You need to use the manufacturing execution functionality that meets this requirement.

What should you use?

### Options:

---

**A-** Job card device

**B-** Production waves

C- License plates

D- Operations schedules

**Answer:**

---

A

**Explanation:**

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/report-finished-job-device>

## Question 3

---

**Question Type: MultipleChoice**

---

A vendor plans to supply replacements for a product that they manufactured.

The cost associated with manufacturing most components of the replacement product differ from costs associated with the original product.

You need to plan for the new cost of the item in determining the sales price.

Which costing version explosion mode should you use?

**Options:**

---

- A- According to BOM line type
- B- Multilevel
- C- Single level
- D- Make to Order

**Answer:**

---

B

**Explanation:**

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/cost-management/simulate-cost-changes-costing-version-planned-costs>

## Question 4

---

**Question Type:** MultipleChoice

---

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has a new speaker that is available with standard and premium carbon fiber options.

For the premium option, speakers are made to order. Customers can choose from seven product attributes at different prices.

You need to create and configure the product and pricing for the new speaker.

Solution: Create a constraint-based product with configurations. Use a price model to calculate the different configurable option costs.

Does the solution meet the goal?

**Options:**

---

A- Yes

B- No

**Answer:**

---

B

## Explanation:

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/pim/dimension-based-product-configuration>

## Question 5

---

### Question Type: MultipleChoice

---

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has a new speaker that is available with standard and premium carbon fiber options.

For the premium option, speakers are made to order. Customers can choose from seven product attributes at different prices.

You need to create and configure the product and pricing for the new speaker.

Solution: Create a constraint-based product master with variants. Use the trade agreements to specify the different pricing.

Does the solution meet the goal?

**Options:**

---

**A-** Yes

**B-** No

**Answer:**

---

B

**Explanation:**

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/pim/dimension-based-product-configuration>

## Question 6

---

**Question Type:** MultipleChoice

---

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

## Question 7

---

### Question Type: MultipleChoice

---

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient.

You need to ensure that the system is set up to support the manufacturing process.

Solution: Configure the catch weight of IngridientA to allow for the variances of the concentrations received from the different vendors.

Does the solution meet the goal?

**Options:**

---

**A-** Yes

**B-** No

**Answer:**

---

B

**Explanation:**

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/batch-balancing>

## Question 8

---

**Question Type:** MultipleChoice

---

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient.

You need to ensure that the system is set up to support the manufacturing process.

Solution: Create a formula version for each concentration level.

Does the solution meet the goal?

**Options:**

---

A- Yes

B- No

**Answer:**

---

B

## Explanation:

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/batch-balancing>

## Question 9

---

### Question Type: MultipleChoice

---

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient.

You need to ensure that the system is set up to support the manufacturing process.

Solution: Set up the IngredientB formula line as a phantom BOM.

Does the solution meet the goal?

**Options:**

---

**A-** Yes

**B-** No

**Answer:**

---

B

**Explanation:**

---

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/batch-balancing>
