Question 1

Which is the smallest Panorama solution that can be used to manage up to 2500 Palo Alto Networks Next Generation firewalls?

Options:

A- M-200

B- M-600

C- M-100

D- Panorama VM-Series

Answer:

D

Question 2

What three Tabs are available in the Detailed Device Health on Panorama for hardware-based firewalls? (Choose three.)

Question 3

Question Type: **MultipleChoice**

What are the three possible verdicts in WildFire Submissions log entries for a submitted sample? (Choose four.)

Options:

A- Benign

B- Spyware

C- Malicious

D- Phishing

E- Grayware

Answer:

A, C, D, E

Question 4

Question Type: **MultipleChoice**

What action would address the sub-optimal traffic path shown in the figure?

Key:

RN - Remote Network

SC - Service Connection

MU GW - Mobile User Gateway

Options:

A- Onboard a Service Connection in the Americas region

B- Remove the Service Connection in the EMEA region

C- Onboard a Service Connection in the APAC region

D- Onboard a Remote Network location in the EMEA region

Answer:

C

Question 5

Question Type: **MultipleChoice**

When having a customer pre-sales call, which aspects of the NGFW should be covered?

Options:

A- The NGFW simplifies your operations through analytics and automation while giving you consistent protection through exceptional visibility and control across the data center, perimeter, branch, mobile and cloud networks

B- The Palo Alto Networks-developed URL filtering database, PAN-DB provides high-performance local caching for maximum inline performance on URL lookups, and offers coverage against malicious URLs and IP addresses. As WildFire identifies unknown malware, zero-day exploits, and advanced persistent threats (APTs), the PAN-DB database is updated with information on malicious URLs so that you can block malware downloads and disable Command and Control (C2) communications to protect your network from cyberthreats. URL categories that identify confirmed malicious content --- malware, phishing, and C2 are updated every five minutes --- to ensure that you can manage access to these sites within minutes of categorization

C- The NGFW creates tunnels that allow users/systems to connect securely over a public network, as if they were connecting over a local area network (LAN). To set up a VPN tunnel you need a pair of devices that can authenticate each other and encrypt the flow of information between them The devices can be a pair of Palo Alto Networks firewalls, or a Palo Alto Networks firewall along with a VPN-capable device from another vendor

D- Palo Alto Networks URL Filtering allows you to monitor and control the sites users can access, to prevent phishing attacks by controlling the sites to which users can submit valid corporate credentials, and to enforce safe search for search engines like Google and Bing

Answer:
D

Question 6

Which three platform components can identify and protect against malicious email links? (Choose three.)

Options:

A- WildFire hybrid cloud solution

B- WildFire public cloud

C- WF-500

D- M-200

E- M-600

Answer:

B, C, D
