Question 1

In an application for configuring hardware equipment for new employees, the manager

chooses a laptop model from a drop-down list. The list of available laptop models is maintained in an external system and may change over time. Which of the following do you use as the data source for this drop-down list ?

Options:

A- A data page

B- A local list

C- A data table

D- A data transform

Answer:

A

Question 2

You are configuring an external data source using the Integration Designer. You have the

REST, Dev, Stage, and Prod endpoint URLs, and a name for the data source. What other information do you need to configure the external data source?

Options:

A- The name of the database where the source data is stored

B- The data views using the external data source

C- A plan for mapping the data and REST response fields

D- A backup endpoint URL if the configured URL refuses to connect

Answer:

C

Question 3

Question Type: **MultipleChoice**

An online sales application supports both laptop and mobile devices. You are configuring theapplication skin and you notice the responsive layout in the mobile device is not displaying views as stakeholders require. Which two options allow you to resolve this situation without negatively impacting the laptop users? (Choose two.)

Options:

A- Use the same application skin in all portals.

B- Update the process to give mobile users a separate portal.

C- Do not use a skin for the mobile application version.

D- Adjust the responsive behavior in the skin for optimal viewing in the mobile portal.

Answer:

A, C

Question 4

Question Type: MultipleChoice

Identify the two requirements that are satisfied by using a data transform. (Choose two.)

Options:

A- Display the same data on multiple user views.

B- Convert integer data to text data.

C- Copy an existing order to a new case.

D- Validate the format of a property value.

Answer:

B, C

Question 5

A reservation process allows customers to reserve a flight, hotel room, and rental car as partof a travel itinerary. Which configuration displays a check box to allow users to select travel insurance only if the itinerary includes a flight?

Options:

A- A visible when condition applied to the check box

B- An action set applied to the check box

C- A declare expression configured for forward chaining

D- A validate rule applied to the flow action

Answer:

A

Question 6

You create an application for employees to submit timesheets. Employees enter

work, vacation, and sick time for a particular week. On the entry form, employees see a summary of the total hours entered. After the employee submits the timesheet, the application displays remaining vacation and sick time for the employee. You configure the user view that displays remaining vacation and sick time. The balance calculates by subtracting the vacation time and sick time for the week from the current vacation and sick time balances. Which configuration option is used to summarize the remaining vacation and sick time?

Options:

A- Use a When rule. When the application references the remaining vacation and sick time, each value calculates.

B- Use declarative processing. Whenever the vacation time or sick time entries change, the remaining vacation and sick time calculate.

C- Use pyDefault and pySetFieldDefaults. When the process invokes the data transforms, the remaining vacation and sick time calculate.

D- Use procedural processing with a data transform. Remaining vacation and sick time calculate after the user submits a timesheet.

Answer:

B

Question 7

Question Type: MultipleChoice

You want your application to have consistent styling across portals. You want the

backgroundcolor of all buttons in your application to be blue. You want the background color of the buttons to be easily updated in case corporate branding changes. Which attribute do you modify to set the background color?

Options:

A- The application skin

B- The buttons format

C- The controls format

D- The background mixin

Question 8

Question Type: **MultipleChoice**

Which business need do you address through delegation?

Options:

A- A service representative must attach the appropriate form when emailing a customer

B- A risk officer wants to adjust the income threshold for automobile loans.

C- A care supervisor wants to authorize a second opinion for an insurance claim.

D- A general manager must approve catering proposals that exceed EUR5000

Question 9

Question Type: MultipleChoice

With Pega's Situational Layer Cake approach, how do you configure a regional variation for Human Resources (HR) time off cases?

Options:

A- Create a rule for the variation and add the rule to the common layer of the application.

B- Create a rule for the variation and replace the existing HR time off rule in the application common layer.

C- Create a rule for the variation and add it to a secondary common application layer.

D- Create a rule for the variation and add the rule to the layer for the region

Answer:

D
