Question 8

Question Type: MultipleChoice

The risk register contains which of the following?

Options:

- A- Identified risks and potential responses
- B- Identified risks and updates to scope baseline
- C- Risk management plan
- D- Risk related contract decisions

Answer:

A

Explanation:

A Risk Register is a Risk Management tool commonly used in Project Management and organizational risk assessments. It acts as a central repository for all risks identified by the project or organization and, for each risk, includes information such as risk probability, impact, counter-measures, risk owner and so on. It can sometimes be referred to as a Risk Log
