Question 1

Question Type: MultipleChoice

Universal Containers has a custom Job object with a private sharing model. Based on the size and location of the Job, different teams must have access to edit the specific Job record. To support this requirement, Apex Managed Sharing has been implemented to share records with the required users. Since the teams change frequently, managed sharing recalculations need to be manually run frequently. What can the Architect do to optimize this process?

Options:

- A- Change the sharing model on the Job object to Public Read/Write.
- B- Create a scheduled job to automatically run the sharing recalculations on a nightly basis.
- C- Create public groups for each team, and share the jobs with the groups instead of users.
- D- Create a custom Visualforce page to edit the jobs and specify Without Sharing on the controller.

Answer:

C

Question 2

Question Type: MultipleChoice

Which two options can help mitigate the risks of import failures associated with large-volume bulk data loads?

Choose 2 answers.

Options:

- A- Minimize user group hierarchy.
- B- Defer Sharing Calculation.
- C- Increase batch size.
- D- Group records by ParentID within a batch.

Answer:

B, D

Question 3

Question Type: MultipleChoice

Universal Containers has just deployed a change to its role hierarchy. A manager is reporting that their staff can now see Accounts that they do not own and should not have access to. How should the Architect troubleshoot?

Options:

- A-** While logged in as the System Administrator, use the Field Accessibility Viewer to view a matrix of who has access to Accounts.
- B-** While logged in as the one of the Staff members, navigate to a sample account and use the Sharing button to determine who has access.
- C-** While logged in as the one of the Staff members, navigate to their user record and inspect their profile and role membership.
- D-** While logged in as the System Administrator, use the Field Accessibility Viewer to view a matrix of who has access to Accounts.

Answer:

B

Question 4

Question Type: MultipleChoice

A dummy user at Universal Containers owns more than 10,000 lead records. The system assigned all these leads to a dummy user. This is causing performance issues whenever role hierarchy changes. Which two options should be recommended to improve performance?

Choose 2 answers.

Options:

- A- Assign ownership to a small number of users.
- B- Add the dummy user into a public group.
- C- Add the dummy user to the bottom of the role hierarchy.
- D- Do not assign a role to the dummy user.

Answer:

A, D

Question 5

Question Type: MultipleChoice

Universal Containers has junction object called "Job Production Facility", with 2 master-detail relationships to the Job and Production Facility custom objects. Both master records have a private sharing model.

What statement is true if a user's profile allows access (Create/Read) to the Job, but no access to the Production Facility Object?

Options:

- A- The user will be granted read access to the Production Facility record
- B- The user will see the junction object and the link to the Production Facility.
- C- The user will see the junction object but not the link to the Production Facility.
- D- The user will not be able to see the junction object records or the field values.

Answer:

D

Question 6

Question Type: MultipleChoice

Which users have access to Opportunity records owned by an external user, assuming no other changes to the sharing model have been implemented?

Options:

- A- The record owner and any user above the external user in the role hierarchy.
- B- The record owner only.
- C- The record owner and any user below the external user in the role hierarchy.
- D- The record owner and all internal users.

Answer:

A

Question 7

Question Type: MultipleChoice

A user at Universal Containers would like to give access to a Report folder to someone else in the organization.

Which two access permissions should the user have to support this requirement?

Choose 2 answers.

Options:

- A- The 'Viewer' Report folder permission
- B- The 'Editor' Report folder permission.
- C- The 'Manage Reports in Public Folders' Profile permission.
- D- The 'Manager' Report folder permission.

Answer:

C, D
