Question 1

Question Type: MultipleChoice

Which credentials are available to track against providers with standard Health Cloud? (Choose two.)

Options:

- A- Specialties
- B- Facility Relationship
- C- Business License
- D- Board Certification

Answer:

A, D

Explanation:

Reference and details below.

Streamline the Credentialing Process. Seamlessly collect credential data in the self-service application. Capture provider applications with integrated credential verification and validation rules for mandatory information. Use the extended data model to capture all aspects of provider education, work history, regulatory action, malpractice insurance, specialty, board certification, and award data to allow for comprehensive verification.

For detailed instructions, see [the Vlocity Provider Network Management documentation](#).

Question 2

Question Type: MultipleChoice

In which three ways can users access Provider Management standard objects? (Choose three)

Options:

- A- By using Service Cloud
- B- By assigning Health Cloud Platform Permission set licenses.
- C- By assigning Health Cloud Foundation Permission set.
- D- By assigning the Provider Permission set.

E- By using Health Cloud.

Answer:

B, C

Explanation:

Health Cloud Foundation

Assigns read access to additional Health Cloud platform capabilities, including the Provider Management data model.

The Health Cloud Provider Network Management permission set grants access to provider management objects so users can manage credentialing and recruiting.

To use the Provider Network Management features of Health Cloud, assign both the Provider Network Management permission set and the Health Cloud permission set to your users

Question 3

Question Type: MultipleChoice

How can Code Sets be managed in Health Cloud?

Options:

- A-** Health Cloud provides a Code Sets data model that is pre-populated with industry standard procedures and diagnostic code sets.
- B-** Health Cloud does not provide a Code Sets data model
- C-** Health Cloud provides a Code Sets data model that must be populated from an external source.
- D-** Health Cloud provides a Code Sets data model that is pre-integrated to authoritative sources to ensure the latest code sets are always available.

Answer:

C

Explanation:

Reference and details below.

As an admin, it's up to you to populate these objects with the **codes** your organization needs. As the volume of required codes can be immense, we recommend that you use the **Salesforce Data Loader to import code data into your orgs.**
