Question 1

Question Type: MultipleChoice

Which of the following technologies can be used for clustering a multi-node instance of Alfresco Process Services? (Choose two.)

Options:

- A- VM Clustering.
- B- Load Balancer.
- C- Proxy.
- D- JLAN Clustering.
- E- Ehcache.

Answer:

B, E

Question 2

Question Type: MultipleChoice

When enabling HTTP API access for embedded Elasticsearch, what action is required to secure access?

Options:

- A- The access to the Elastic Search HTTP API needs to be controlled through firewall rules.
- B- The Elasticsearch HTTP API needs to be configured to require authentication.
- C- The users of Alfresco Process Services who should access Elasticsearch should be constrained.
- D- The information available through the Elasticsearch HTTP API should be constrained.

Answer:

C

Question 3

Question Type: MultipleChoice

When a new user is created, which capabilities groups is the new user assigned to by default?
(Choose two.)

. app-designer-users

Options:

- B- analytics-users
- C- tenant-managers
- D- Superusers
- E- Administrators

Answer:

B, E

Question 4

Question Type: MultipleChoice

The Alfresco Cloud configuration was set in the activiti-app.properties file, but the attach field on the forms does not render the Alfresco Cloud icon. What is the issue?

Options:

- A- The capability 'Alfresco Cloud Access' needs to be added to the capability group and for the users assigned to that group.
- B- The Alfresco Cloud enablement property is set incorrectly in the activiti-app.properties file.
- C- The tenant configuration in activiti-app must have the Alfresco Cloud endpoint defined.
- D- The tenant configuration in activiti-app needs to have the Alfresco Cloud checkbox checked.

Answer:

A

Question 5

Question Type: MultipleChoice

Which one of the following categories is NOT exposed as a tab in the Activiti Admin application?

Options:

- A- Apps.
- B- Forms.
- C- Tasks.
- D- Jobs.
- E- Instances.

Answer:

B

P2P
exams

Question 6

Question Type: MultipleChoice

Which situation will cause an app import failure?

Options:

- A- The export of the app archive file (zip), was from a newer activiti-app version compared to the version activiti-app you are importing into.
- B- The export of the app archive file (zip), contains process model references to user/group IDs that are not available in the activiti-app you are importing into.
- C- The export of the app archive file (zip), was from an older activiti-app version compared to the version activiti-app you are importing into.
- D- The export of the app archive file (zip) contained invalid processes, which causes failure to import.

P2P
exams

Answer:

D

Question 7

Question Type: MultipleChoice

What is an alternative to copying an exported process app zip file and importing manually, when publishing a process app to multiple environments?

Options:

- A- Share the database resource of the development activiti-app environment with the production activiti-app environment.
- B- Use App Designer 'share' feature to replicate the app to each production activiti-app environment.
- C- Export the app as a zip, and copy it to the activiti-app/workflow directory of each production server for automatic publishing.
- D- Use an activiti-admin application to deploy the existing process app from the activiti-app development environment to each activiti-app production environment.

Answer:

D

P2P
exams

Question 8

Question Type: MultipleChoice

Alfresco Process Services uses the 3rd party library Aspose to transform documents. Which statements are correct regarding Aspose? (Select two.)

Options:

- A- When activiti-app is installed with installer, no manual action is needed to deploy an Aspose license to fully function.
- B- When activiti-app is installed using the war distributions, an Aspose license named "transform.lic" has to be deployed manually.
- C- Regardless of how activiti-app is installed, Aspose does not require a license to be deployed in order to fully function.
- D- When activiti-app is installed using the war distributions, no manual action is needed to deploy an Aspose license to fully function.
- E- Regardless of how activiti-app is installed, the path to the required Aspose license can be configured in the activiti-admin.properties file.

Answer:

B, E

Question 9

Question Type: MultipleChoice

Which activiti-app configuration property, controls default access to Analytics for new users?

Options:

- A- user.analytics.enabled
- B- app.analytics.enabled
- C- app.analytics.default.enabled
- D- analytics.users.enabled

Answer:

C

Question 10

Question Type: MultipleChoice

What do the Google Drive and Box integrations require to properly function with Alfresco Process Services?

Options:

- A- There needs to be a valid development account to access the API.
- B- There needs to be a SHA2 security token.
- C- There needs to be a secret key.
- D- There needs to be a certificate with a secret token.

Answer:

A

Question 11

Question Type: MultipleChoice

In which situations would the thumbnail of an attached document not render on a task form?
(Choose two.)

Options:

- A- Alfresco Process Services cannot find a license for Aspose, the 3rd party library being responsible for document previews and thumbnails.
- B- The uploaded document is larger than the allowed maximum file size of 5MB.
- C- The uploaded document has a MIME type that cannot be rendered as thumbnail.
- D- Elasticsearch is not configured/installed properly.
- E- The form page has to be refreshed in order to render the thumbnail.

Answer:

B, E

Question 12

Question Type: MultipleChoice

Which one of the following options is valid to determine the job id for a job?

Options:

- A- One can determine the job id as a part of the URL while reviewing a related process in activiti-app.
- B- One can determine the job id via the Jobs tab in activiti-admin.
- C- One can determine the job id as a part of the URL while reviewing a related task in activiti-app.
- D- One can determine the job id by reviewing the Monitoring tab in activiti-admin.

Answer:

B

Question 13

Question Type: MultipleChoice

By default, into which of the following filesystem locations can the Alfresco Process Services' license file be uploaded? (Choose two.)

Options:

- A- In the application container classpath.
- B- In the license subfolder of the installation directory.
- C- The property site.manufacturing.processApp needs to be set in Alfresco Process Services' alfresco-global.properties file, whereas the value for this property must be the name of the process app as defined in Alfresco Process Services.
- D- In the location defined by the \$USER_HOME environment variable.
- E- In the filesystem location defined by \$USER_HOME/.activiti/enterprise-license/

Answer:

A, E
