## Question 1

---

**Question Type:** MultipleChoice

---

Which of the following features are provided by PolarDB-O's proxy? (Number of correct answers: 4)

### Options:

---

- A- Read/write splitting
- B- Load balancing
- C- Health checks for nodes
- D- Failover strategies for high availability
- E- Data encryption

### Answer:

---

A, B, C, D

## Question 2

---

**Question Type:** MultipleChoice

---

Which of the following are the core technologies behind Database Backup Service? (Number of correct answers: 3)

**Options:**

---

- A- Multi-cloud and multi-backend backup
- B- Real-time synchronization
- C- High mount speeds (a few seconds)
- D- Online query and analysis

**Answer:**

---

A, B, C

## Question 3

---

**Question Type:** MultipleChoice

---

Which of the following computing capabilities are supported by AnalyticDB? (Number of correct answers: 4)

**Options:**

---

- A- Complex extract, transform, load (ETL)
- B- Interactive analysis
- C- Simple point query
- D- Real-time update
- E- Machine Learning

**Answer:**

---

A, B, D, E

## Question 4

---

**Question Type: MultipleChoice**

---

Which of the following scheduling tools are supported by AnalyticDB for MySQL? (Number of correct answers: 2)

**Options:**

---

- A- DMS
- B- Data Works
- C- MaxCompute
- D- QuickBI

**Answer:**

---

A, B

## Question 5

---

**Question Type:** MultipleChoice

---

Which of the following are the advantages of cloud databases over self-managed databases? (Number of correct answers: 3)

**Options:**

---

- A- Stronger service level agreement (SLA)
- B- Integrated operations and maintenance (O&M), as well as easier management
- C- High availability and comprehensive backup and monitoring capabilities

**D-** High costs

**Answer:**

---

A, B, C

## Question 6

---

**Question Type: MultipleChoice**

---

Which of the following are reasonable Data Transmission Service (DTS) use cases? (Number of correct answers: 4)

**Options:**

---

**A-** Database migration without interrupting services / downtime

**B-** Geo-disaster recovery and active geo-redundancy for databases

**C-** Synchronizing data to data warehouses in real time to build data warehouses for real-time analytics.

**D-** Configuring data audit rules to manage data quality.

**E-** Synchronizing information about user accounts and permissions.

**F-** Change tracking and data distribution.

**Answer:**

---

A, B, F

## Question 7

---

**Question Type: MultipleChoice**

---

Data Management (DMS) provides features related to data warehouse development to support task orchestration and recurring scheduling. Which of the following features are being developed? (Number of correct answers: 3)

**Options:**

---

- A- Data lineage
- B- Data quality
- C- Data visualization
- D- Data directory
- E- Data service

**Answer:**

---

A, B, E
