## Question 1

---

**Question Type:** MultipleChoice

---

Many of Alibaba Cloud services provide highly reliable data storage capacity. For example, Object Storage Service (OSS) promises that its data reliability is no less than 99 99999999%. This high data reliability is solely achieved by RAID 0+1 redundancy technology.

**Options:**

---

**A-** True

**B-** False

Product Questions:

**Answer:**

---

A

## Question 2

---

**Question Type:** MultipleChoice

---

Auto Scaling can automatically adjust the number of ECS instances based on user-defined scaling rules to meet service needs. If a user cannot predict service changes or does not have enough history data, he/she can still use dynamic scaling mode to automatically add/remove ECS instances based on certain CloudMonitor performance metrics (such as the CPU utilization rate)

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

All RDS for MySQL backups are full backups.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

The Alibaba Cloud CDN can directly accelerate access to the files stored in OSS and reduce OSS traffic costs.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 5

---

**Question Type: MultipleChoice**

---

Different Alibaba Cloud VPCs are completely isolated from each other.

By default, the VPCs cannot communicate with each other over Intranet, but you can establish VPN connections via the Internet to achieve interconnection between VPCs.

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

A

## Question 6

---

**Question Type: MultipleChoice**

---

After stopping an Alibaba Cloud Elastic Compute Service (ECS) instance, since the ECS instance is stopped, you will not be charged for anything related to that ECS instance until you start the instance again regardless of which region the instance is located in.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 7

---

**Question Type:** MultipleChoice

---

Once ECS is created, you can't change its private IP address anymore.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 8

---

**Question Type: MultipleChoice**

---

Alibaba Cloud provides comprehensive security protection covering networks, hosts, applications, databases, and content for on-cloud clients. Users using Alibaba Cloud services only need to focus on their own services, without the need to pay any attention to security protection issues.

**Options:**

---

A- True

B- False

**Answer:**

---

B
