**D-** Only if running in VPC

**Answer:**

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

If I modify a DB Instance or the DB parameter group associated with the instance, should I reboot the instance for the changes to take effect?

**Options:**

---

**A-** No

**B-** Yes

**Answer:**

---

B

## Question 3

---

**Question Type:** MultipleChoice

---

How many relational database engines does RDS currently support?

**Options:**

---

- A- MySQL, Postgres, MariaDB, Oracle and Microsoft SQL Server
- B- Just two: MySQL and Oracle.
- C- Five: MySQL, PostgreSQL, MongoDB, Cassandra and SQLite.
- D- Just one: MySQL.

**Answer:**

---

A

## Question 4

---

**Question Type:** MultipleChoice

---

What does Amazon RDS stand for?

**Options:**

---

- A- Regional Data Server.
- B- Relational Database Service
- C- Regional Database Service.

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

Which of these configuration or deployment practices is a security risk for RDS?

**Options:**

---

- A- Storing SQL function code in plaintext
- B- Non-Multi-AZ RDS instance
- C- Having RDS and EC2 instances exist in the same subnet
- D- RDS in a public subnet

**Answer:**

---

D

## Question 6

---

**Question Type:** MultipleChoice

---

Can I encrypt connections between my application and my DB Instance using SSL?

**Options:**

---

**A-** No

**B-** Yes

**C-** Only in VPC

**D-** Only in certain regions

**Answer:**

---

B

## Question 7

---

**Question Type:** MultipleChoice

---

**Options:**

---

- A- AWS SES

- B- AWS Cloudtrail
- C- AWS CloudWatch
- D- AWS SNS

**Answer:**

---

D

## Question 10

---

**Question Type:** MultipleChoice

---

A user is planning to setup notifications on the RDS DB for a snapshot. Which of the below mentioned event categories is not supported by RDS for this snapshot source type?

**Options:**

---

- A- Backup
- B- Creation
- C- Deletion

**D-** Restoration

**Answer:**

---

A

## Question 11

---

**Question Type: MultipleChoice**

---

A sys admin is planning to subscribe to the RDS event notifications. For which of the below mentioned source categories the subscription cannot be configured?

**Options:**

---

**A-** DB security group

**B-** DB snapshot

**C-** DB options group

**D-** DB parameter group

**Answer:**

---

C

## Question 12

---

**Question Type:** MultipleChoice

---

A user is receiving a notification from the RDS DB whenever there is a change in the DB security group. The user does not want to receive these notifications for only a month. Thus, he does not want to delete the notification. How can the user configure this?

**Options:**

---
