Question 1

Question Type: MultipleChoice

To create REST services, you are required to deploy an enterprise service bus due to the need for inherent message routing functionality. Select the correct answer.

Options:

A- True

B- False

Answer:

B

Question 2

Question Type: MultipleChoice

SOAP messages contain headers that can be customized but are also used to implement industry-standard features provided by technologies, such as WS-Addressing. Select the correct answer.

Options:

A- True

B- False

Answer:

A

Question 3

Question Type: MultipleChoice

Services hosted within an enterprise service bus cannot support asynchronous message exchanges due to the limitations of message routing features built into enterprise service bus implementations. Select the correct answer.

Options:

A- True

B- False

Answer:

B

Question 4

Question Type: MultipleChoice

Which of the following statements make sense? SELECT ALL THAT APPLY

Options:

A- I have 3 SOAP-based Web services, each with its own individual service contract.

B- I have 3 REST services, all of which share the same uniform contract.

C- I have 3 SOAP-based Web services, each with its own uniform contract.

D- I have 3 REST services, each of which is designed to be accessed via the same set of HTTP methods.

Answer:

A, B, D

Question 5

Question Type: MultipleChoice

Which of the following statements makes sense? Select the correct answer.

Options:

- A-** I discovered the service I was looking for by using WS-Addressing to issue service search queries.
- B-** I discovered the service I was looking for by building a WS-BPEL process definition.
- C-** I discovered the service I was looking for by searching the UDDI-compliant service registry.
- D-** None of these statements make sense.

Answer:

C

Question 6

Question Type: MultipleChoice

XSLT is a technology that is primarily used to address _____ . Select the correct answer.

Options:

- A- technology protocol bridging requirements (such as when .NET and Java components need to speak to each other)
- B- data model transformation requirements (such as when similar data based on different XML schemas needs to be exchanged)
- C- layer transformation requirements (such as when data located in different architectural layers needs to be exchanged between architectural layers)
- D- service transformation requirements (such as when two versions of the same service exist)

Answer:

B

Question 7

Question Type: MultipleChoice

Orchestration is most commonly associated with which industry standard? Select the correct answer.

Options:

A- WS-Addressing

B- XML Schema

C- WS-BPEL

D- WS-Policy

Answer:

C

Question 8

Question Type: MultipleChoice

Which of the following technologies has a namespace pre-defined by an industry standards organization? Select the correct answer.

Options:

A- WS-Addressing

B- REST

C- Web 2.0

D- Because all Web-based technologies are required to have namespaces, all of the above technologies have pre-defined namespaces.

Answer:

A

Question 9

Question Type: MultipleChoice

MEP stands for: Select the correct answer.

Options:

A- Message Extension Pair

- B- Message Exchange Pattern
- C- Mixed Entry Platform
- D- Mixed Elevation Program

Answer:

B

Question 10

Question Type: MultipleChoice
