## Question 1

---

**Question Type:** MultipleChoice

---

What could be done to clarify the differentiation in the frequency of aggression among the environments shown in this graph?

**Options:**

---

- A-** Use an equal interval graph.
- B-** Record data for an entire week.
- C-** Include more environments along the horizontal axis.
- D-** Change the vertical axis so that the range is zero to twenty.

**Answer:**

---

D

## Question 2

---

**Question Type:** MultipleChoice

---

In this graph, what is plotted on number 1?

**Options:**

---

- A- dependent variable
- B- independent variable
- C- session
- D- setting

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

Data were collected on the percentage of intervals at the end of which Thomas was present at his workstation. Which is the BEST method for displaying these data?

**Options:**

---

- A- cumulative record
- B- equal-interval line graph
- C- scatterplot
- D- standard behavior (semilogarithmic) chart

**Answer:**

---

B

## Question 4

---

**Question Type:** MultipleChoice

---

To address hitting others, two procedures were compared. differential reinforcement of incompatible behavior and time-out. The outcomes were examined within and across subjects. A withdrawal design was employed. The BEST response measure to use in this study is frequency of F.

**Options:**

---

- A- the incompatible behavior.
- B- being sent to time-out.
- C- hitting others.
- D- reinforcer delivery.

**Answer:**

---

C

## Question 5

---

**Question Type:** MultipleChoice

---

A behavior analyst is asked to consult about a 10-year-old child who gets out of his seat during class at least once every 15 minutes. The behavior analyst wants the teacher to collect data on the child's on-task behavior. Given that the teacher works alone in the classroom with 30 children, the BEST procedure to employ would be.

**Options:**

---

- A- interval recording.

- B- latency recording.
- C- duration recording.
- D- time sampling.

**Answer:**

---

D

## Question 6

---

**Question Type:** MultipleChoice

---

One of the MOST important reasons for writing a precise definition of behavior is that a precise definition:

**Options:**

---

- A- produces greater interobserver agreement and requires less training time for observers.
- B- allows for easier and more reliable quantification of temporal locus and temporal extent.
- C- increases the likelihood that the behavior of interest will be reliably detected by observers or measurement equipment.
- D- makes calibration checks of observers or measurement equipment less necessary.

**Answer:**

---

C

## Question 7

---

**Question Type:** MultipleChoice

---

John's instructional program has successfully increased the number of words he reads correctly per minute. The procedures used include special worksheets, contingent reinforcement for number of words read correctly, and peer tutoring. The behavior analyst wants to determine which part or parts of the treatment have been effective, so he systematically dismantles the treatment and withdraws elements until the reading no longer improves. The behavior analyst is completing A

**Options:**

---

- A- component analysis.
- B- multi-element design.
- C- parametric examination.
- D- reversal design.

**Answer:**

---

A
