Question 1

Question Type: MultipleChoice

The Work Queue "Customer Onboarding" has a number of Pending Items which may be tagged as "Domestic", "Retail" or "Business" There is also a tag for the 8 digit product code formatted as "Product Code: {product code}" e.g. Product Code: CA123456.

What is the correct configuration to get the next item from the queue that:

* Isn't applying for a loan product i.e. Product Code doesn't begin with "LN"

And

* Is a domestic customer

Options:

- A- Configure 'Domestic; -Product Code: I_N' in the Tag Filter parameter
- B- Configure 'Domestic; -Product Code: LN?' in the Tag Filter parameter
- C- Configure 'Domestic and Product Code <> LN?' in the Tag Filter parameter
- D- Configure 'Domestic + [Product Code] <> LN*"' in the Tag Filter parameter

Answer:

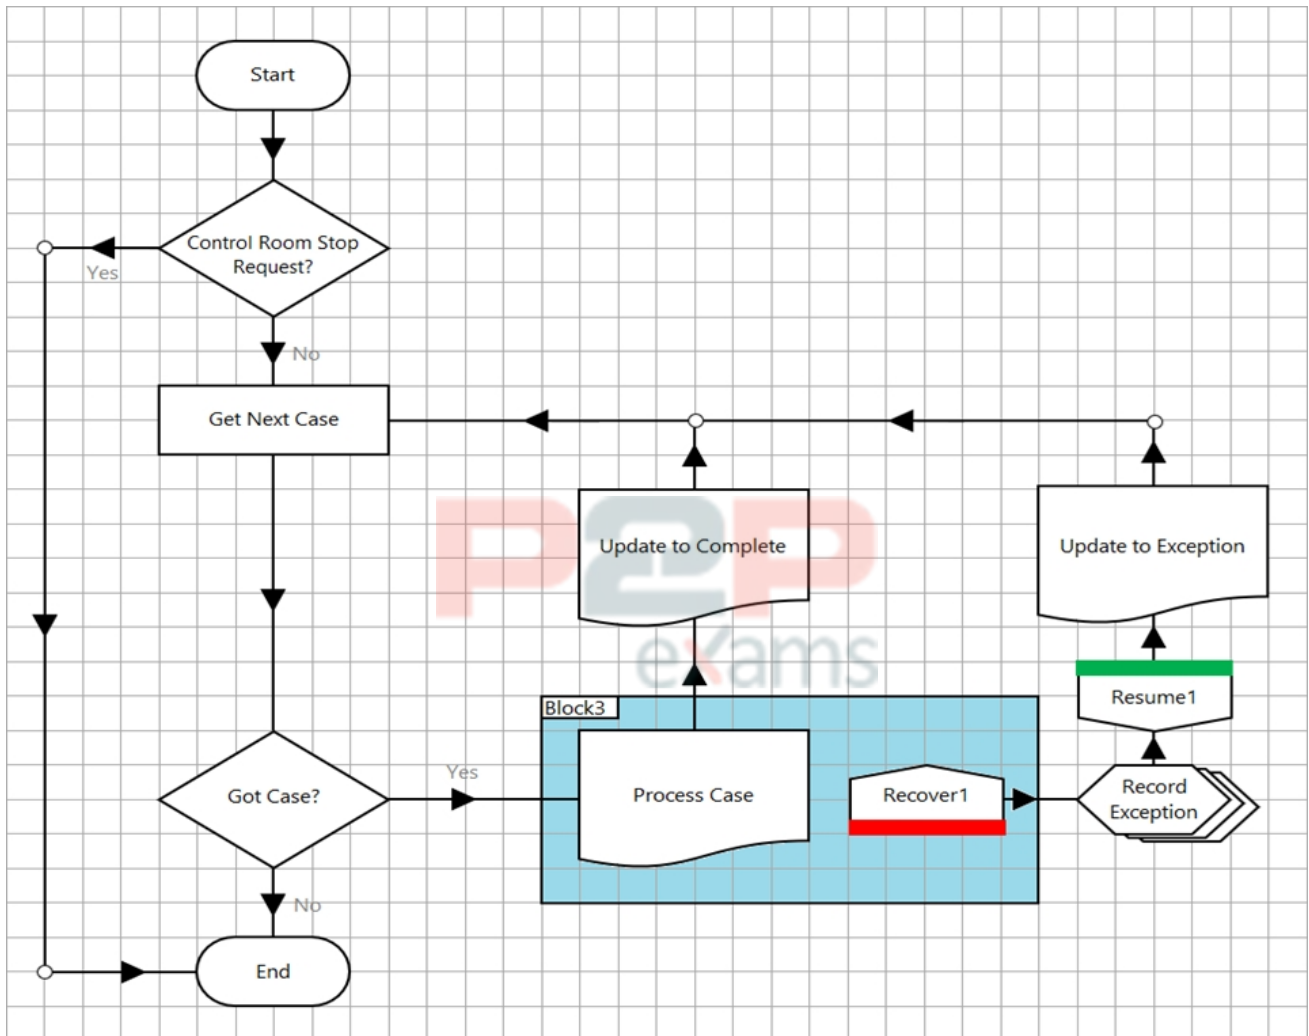

B

Question 2

Question Type: FillInTheBlank

Examine the following Blue Prism Process diagram:

The Process contains logic in the 'Control Room Stop Request?' Decision stage, to recognise when a Process Controller has used the 'Request Stop' feature in Control Room, to bring the Process to a controlled stop.

What expression would you use in the 'Control Room Stop Request?' Decision stage, to ensure that the Process recognises that the Control Room 'Request Stop' command has been triggered?

(Remember, Blue Prism expressions are case sensitive)

Answer:

IsStopRequestedenvironmentfunction

Explanation:

<https://bpdocs.blueprism.com/bp-6-10/en-us/frmControlRoom.htm>

Question 3

Question Type: MultipleChoice

Which statements are TRUE about the Blue Prism Release Manager""

Select the TWO correct answers.

Options:

- A- Release files can be imported by anyone regardless of their user permissions
- B- You must have a defined Package prior to a Release being generated
- C- Modify Package wizard will update previous components released within your environment
- D- Only Release (.bprelease) or Skill packages (.bpskill) files can be imported
- E- The Verify wizard will test a Package's components for changes since the last Release

Answer:

B, D

Explanation:

Defined Package Requirement:

To generate a release, you must first define a package. The package includes all the components (processes, objects, etc.) that will be included in the release.

File Types for Import:

Blue Prism allows importing of two types of files: Release files (.bprelease) and Skill packages (.bpskill). These are the only file types that can be imported via the Release Manager.

Incorrect Statements:

A . Release files cannot be imported by anyone regardless of their user permissions. Importing releases requires specific user permissions.

C . The Modify Package wizard does not update previous components released within your environment; it modifies the package for the current release.

E . The Verify wizard does not test a Package's components for changes since the last release; it ensures all components are included and dependencies are met.

Blue Prism documentation on Release Manager and package management.

Question 4

Question Type: MultipleChoice

An Action in a Business Object needs to use Global Send Keys to populate the 'Staff Number' field in an application called Centrix Data Solutions. The application is in focus and the cursor is placed in the Staff Number field.

Examine the stage properties window below:

The screenshot shows the 'Navigate Properties' window for a stage named 'Send Staff Number - Global Send Keys'. The 'Application Explorer' on the left displays a tree structure for 'Centrix Data Solutions' with the following hierarchy: Window: Login > Panel: Login Details > Textbox: Staff Number > Textbox: Password. The 'Actions' table on the right has columns: Element, Params, Action, and Inputs Set. The 'Inputs' table below it has columns: Name, Datatype, and Value. The 'Stage logging' is set to 'Disabled' and the 'Warning threshold' is 'System Default'. The 'Number of minutes' is set to 5.

In order to configure a Global Send Keys action to populate the Staff Number field, which element in the Application Explorer tree displayed above, would you drag to the Element column in the stage, so that this operation can be complete?

Options:

- A- Textbox: Staff Number
- B- Window: Login
- C- Panel: Login Details
- D- Centrix Data Solutions

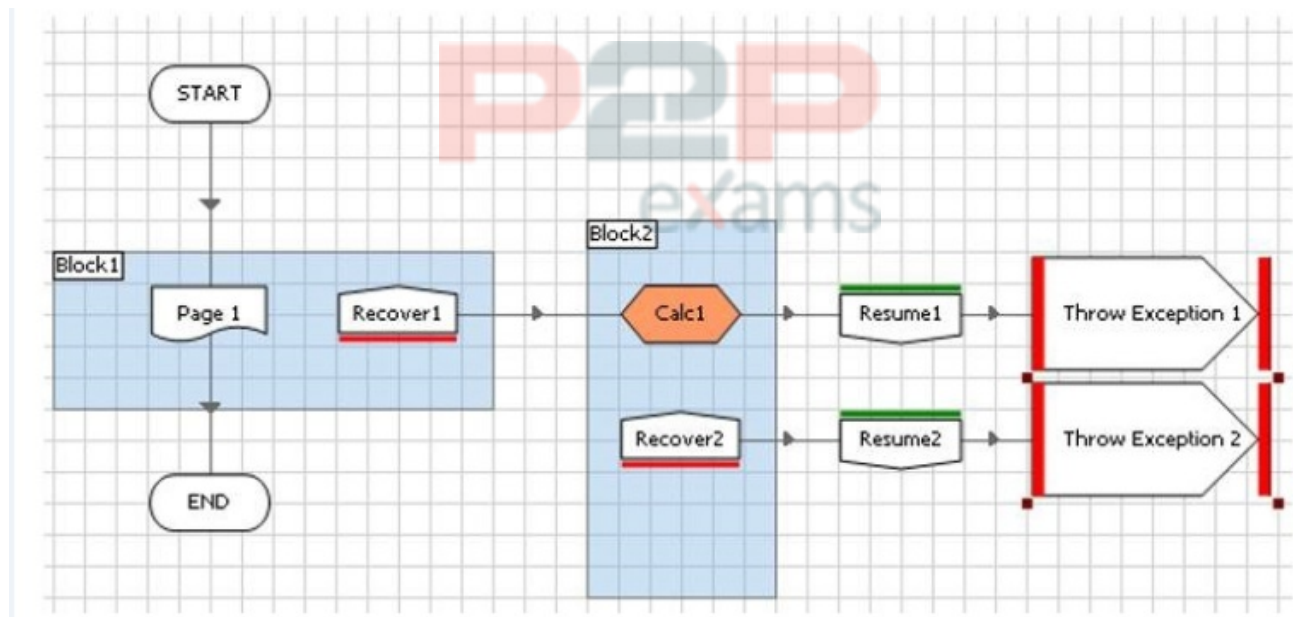

Answer:

A

Question 5

Question Type: MultipleChoice

Examine the Process below:

An error has been encountered on Page 1 and the exception has bubbled up to be recovered in the Recover 1 stage. If there is an error in the Calc 1 stage which path will the Process take?

Options:

- A- The Process will continue to the Resume 1 Stage
- B- The Error will cause the Process to terminate
- C- The Error will be recovered in the Recover2 Stage
- D- The Error will cause the Process to jump to the End Stage

Answer:

B

Question 6

Question Type: MultipleChoice

Which of the following about an object's run mode is true?

Options:

- A- A run mode of background will enable the business object to run at the same time as other foreground business objects
- B- A run mode of background will enable the business object to run at the time a other background, foreground and exclusive business objects
- C- A run mode of exclusive cannot at the same time as any other business object
- D- The run mode of a business object has no influence on how many business objects can be run at the same time

Answer:

C
