### Options:

---

- A- Keep flag
- B- Dynamic join
- C- Transparent filter
- D- Non-equijoin

### Answer:

---

B, C

## Question 3

---

**Question Type:** MultipleChoice

---

What statement must you insert to the following OData service to complete the navigation definition from the customer entity set to the corresponding sales orders? Please choose the correct answer.

service{ "sample.odata::customer" as customer" navigates ("Customer\_Orders\* as "toOrders); "sample.odata::salesorder" as "Orders";)

**Options:**

---

- A- Aggregation
- B- Association
- C- Key specification
- D- Join condition

**Answer:**

---

B

## Question 4

---

**Question Type: MultipleChoice**

---

What are the nodes where filter expressions can be used in a calculation view? There are 2 correct answers to this question.

**Options:**

---

A- Aggregation

B- Star join

C- Union

D- Rank

**Answer:**

---

A, B

## Question 5

---

**Question Type:** MultipleChoice

---

You define exception handling in a SQL Script procedure. What can you use declare exit handlers for? There are 2 correct answers to this question.

**Options:**

---

A- Generic SQL conditions

B- Generic SQL exceptions

**C-** Specific SQL error codes

**D-** Specific SQL conditions

**Answer:**

---

C, D

## Question 6

---

**Question Type:** MultipleChoice

---

You created several database tables in a multi-target application and need to keep their names as short as possible. Which parameter of the .hdnamespace file do you set to ignore? Please choose the correct answer.

**Options:**

---

**A-** name

**B-** hdbtable

**C-** mixinTypes

**D-** subfolder

**Answer:**

---

D

## Question 7

---

**Question Type:** MultipleChoice

---

To perform a specific task of an XS advanced application, what does a user need? Please choose the correct answer.

**Options:**

---

- A-** To have directly assigned a Role Collection
- B-** To have directly assigned a Scope
- C-** To be assigned to an Organization
- D-** To be assigned to a Space

**Answer:**

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

Which OData capacity do you use when you need to restrict the number or selection of exposed columns? Please choose the correct answer.

### Options:

---

- A- Parameter entity sets
- B- Aggregation
- C- Key specification
- D- Property projection

### Answer:

---

D

## Question 9

---

**Question Type:** MultipleChoice

---

In which of the following objects can you use Commit and Rollback statements? Please choose the correct answer.

**Options:**

---

- A- Scalar user-defined function
- B- SQL Script procedure
- C- Table user-defined function
- D- Scripted calculation view

**Answer:**

---

B

## Question 10

---

**Question Type: MultipleChoice**

---

Which configuration file indicates the program that is executed upon start up when you run the Node.js module? Please choose the correct answer.

**Options:**

---

A- package.json

B- project.json

C- server.js

D- mta.yaml

**Answer:**

---

A

## Question 11

---

**Question Type:** MultipleChoice

---

You need to manage an exception in a SQLScript. Which SQLScript features can you use? There are 2 correct answers to this question.

**Options:**

---

A- DECLARE EXIT HANDLER

- B- SIGNAL
- C- DEFINE RESIGNAL
- D- CREATE EXIT HANDLER

**Answer:**

---

A, B

## Question 12

---

**Question Type:** MultipleChoice

---

Which join type is NOT supported by join optimization (pruning)? Please choose the correct answer.

**Options:**

---

- A- Outer Join
- B- Text Join
- C- Referential Join
- D- Inner Join

**Answer:**

---

D
