Question 1

Question Type: MultipleChoice

A customer wants to asynchronously replicate file data from a production Dell Unity 550F to a remote office in the same city with a UnityVSA. When attempting to replicate one of the file systems, the replication option is not available.

What should a technical architect advise the customer?

Options:

- A- Asynchronous replication is not supported to a UnityVSA
- B- The NAS server for the file system must be replicated
- C- Asynchronous replication requires a greater replication distance
- D- Only synchronous replication is supported on file systems

Answer:

A

Explanation:

Question 2

Question Type: MultipleChoice

What is achieved by adding a top tier of SSDs when designing a Dell Unity XT hybrid solution with FAST VP and FAST Cache?

Options:

- A- Isolates file top-talkers I/O from block data I/O
- B- Improves compression space efficiencies
- C- Provides an additional data redundancy layer
- D- Helps keep paged metadata on FLASH media

Answer:

A

Question 3

Question Type: MultipleChoice

A customer must protect file storage resources through asynchronous replication to other Dell Unity XT systems in different locations.

What is the maximum number of remote systems that can be configured?

Options:

A- 4

B- 24

C- 16

D- 8

Answer:

B

Question 4

Question Type: MultipleChoice

Which CPU family is used on a Dell Unity XT 480?

Options:

A- ice Lake

B- Haswell

C- Skylake

D- Broadwell

Answer:

C

Question 5

Question Type: MultipleChoice

A customer must restrict the share content visibility of a Dell Unity file system based on the access rights. What attribute at the share level must be used?

Options:

- A- Continuous availability
- B- Access-based enumeration
- C- Protocol encryption
- D- Offline availability

Answer:

C

Question 6

Question Type: MultipleChoice

A Windows client using the SMB protocol is trying to access a multiprotocol file system from a Dell Unity XT NAS server. The local group database was checked and no mapping was found.

What is the next step in the SID to UID resolution process?

Options:

- A- The Windows user access is removed
- B- The domain controller is checked
- C- The Windows user is mapped to the default UNIX account
- D- Secmap is checked

Answer:

B

Question 7

Question Type: MultipleChoice

What is the maximum capacity of a file system on a Dell Unity XT 380?

Options:

- A- 64 TB
- B- 32 TB
- C- 256 TB

D- 128 TB

Answer:

C

Question 8

Question Type: MultipleChoice

A database volume on a Dell PowerStore cluster has a Protection Policy that is applied with a single snapshot rule. The policy takes a snapshot every hour and retains them for 48 hours. The storage administrator must present a copy of the database volume to a test environment.

Which action does the storage administrator take to meet this requirement?

Options:

- A- Restore the snapshot to a new test volume
- B- Create a thin clone of the database volume and map it to the test host
- C- Create a new snapshot policy for the test volume

D- Create a snapshot of the database volume and map it to the test host

Answer:

C

Question 9

Question Type: MultipleChoice

Which Dell PowerStore supported media devices carry a FIPS Type D certification?

Options:

A- NVMe SCM NVMe SSD, and SAS SSD

B- SAS HDD. NVMe SSD NVMe SCM, and SAS SSD

C- SAS SCM NVMe SSD and NVRAM

D- SAS SSD NVMe SSD NVMe SCM, and NVRAM

Answer:

C

Question 10

Question Type: MultipleChoice

Which Dell PowerStore migration method is recommended to remediate an out of space condition?

Options:

A- Assisted Migration

B- Migrate

C- Live Migrate

D- Auto Placement

Answer:

A

Question 11

Question Type: MultipleChoice

What is the maximum number of snapshot rules that can be associated with a Dell PowerStore protection policy?

Options:

A- 8

B- 2

C- 4

D- 1

Answer:

C
