Question 1

Question Type: MultipleChoice

An input in the data architecture context diagram includes data governance.

Options:

A- TRUE

B- FALSE

Answer:

B

Question 2

Question Type: MultipleChoice

Data science merges data mining, statistical analysis, and machine learning with the integration and data modelling capabilities, to build predictive models that explore data content patterns.

Options:

A- FALSE

B- TRUE

Answer:

B

Question 3

Question Type: MultipleChoice

Data governance requires control mechanisms and procedures for, but not limited to, escalating issues to higher level of authority.

Options:

A- FALSE

B- TRUE

Answer:

B

Question 4

Question Type: MultipleChoice

Subtype absorption: The subtype entity attributes are included as nullable columns into a table representing the supertype entity

Options:

A- FALSE

B- TRUE

Answer:

B

Question 5

Question Type: MultipleChoice

Changes to reference data do not need to be management, only metadata should be managed.

Options:

A- TRUE

B- FALSE

Answer:

B

Question 6

Question Type: MultipleChoice

Project that use personal data should have a disciplined approach to the use of that dat

a. They should account for:

Options:

- A- What activities analytics will focus on
- B- How they select their populations for study
- C- All of the above
- D- How data will be captured
- E- How results will be made accessible

Answer:

C

Question 7

Question Type: MultipleChoice

Inputs in the Data Integration and Interoperability context diagram include:

Options:

- A- Data needs & standards
- B- Data semantics
- C- Business goals & strategies
- D- Source data

Answer:

A, B, C, D

Question 8

Question Type: MultipleChoice

A goal of a Reference and Master Data Management program include enabling master and reference data to be shared across enterprise functions and applications.

Options:

- A- FALSE
- B- TRUE

Answer:

B

Question 9

Question Type: MultipleChoice

Data modelling tools are software that automate many of the tasks the data modeller performs.

Options:

A- FALSE

B- TRUE

Answer:

B

Question 10

Question Type: MultipleChoice

The operational data quality management procedures depend on the ability to measure and monitor the applicability of data.

Options:

A- FALSE

B- TRUE

Answer:

A

Question 11

Question Type: MultipleChoice

The best preventative action to prevent poor quality data from entering an organisation include:

Options:

- A- Institute a formal change control
- B- Define and enforce rules
- C- Implement data governance and stewardship
- D- None of the above
- E- Train data procedures
- F- Establish data entry controls

Answer:

A, B, C, E, F

Question 12

Question Type: MultipleChoice

Improving data quality requires a strategy that accounts for the work that needs to be done and the way people will execute it.

Options:

A- TRUE

B- FALSE

Answer:

A
