## Question 1

---

**Question Type:** MultipleChoice

---

A customer wants to integrate Aruba CX switches with the company's own orchestration tool. What should you suggest?

### Options:

---

- A- Have customer staff use the switch's native UI, which eliminates the need for complex orchestration
- B- That the customer team use the switches restfull API to program the integration
- C- Customer choose an HPE orchestration tool that best fits aruba's data center solutions
- D- Customer use Aruba Clearpass to integrate switches with aruba tool

### Answer:

---

A

## Question 2

---

**Question Type:** MultipleChoice

---

You are proposing an aruba datacenter networking solution to a customer who is also considering Juniper. What is the advantage of aruba over juniper that you should emphasize?

**Options:**

---

- A-** Aruba's solutions exceed Juniper's capabilities in automation, programming, and integrated analytics
- B-** Aruba offers several specialized datacenter switch families for different purposes, while Juniper offers only one
- C-** Aruba specializes in cloud service provider markets, while Juniper focuses on smaller data centers
- D-** Aruba offers more customizable licensing than Juniper. Aruba customers can choose between different licenses to enable different features

**Answer:**

---

D

## Question 3

---

**Question Type:** MultipleChoice

---

What is a key fact that is preventing companies from moving their workloads to the edge?

**Options:**

---

- A- IT is concerned about the security implications of moving workloads to the edge
- B- An increasing number of IoT devices are connected to the network and require cloud connections
- C- IT leaders don't understand the value of moving workloads to the edge
- D- Not enough data being generated at the edge and moving data from the data center is expensive

**Answer:**

---

D

## Question 4

---

**Question Type: MultipleChoice**

---

Which two Aruba solutions are available as SaaS solutions?

**Options:**

---

- A- CX APs and Switches.

- B-** Central Aruba and Clearpass
- C-** Aps and Gateways
- D-** Central Aruba and CX switches

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

How Aruba AI Insights Simplifies IT Operations Tasks

**Options:**

---

- A-** IT gains full spectrum visibility and ability to identify and profile the full range of IoT devices and clients
- B-** IT no longer has to manually set baselines, causing false positives. Instead, AI Insights establishes dynamic baselines based on the customer's network to monitor key metrics
- C-** IT has a centralized place to run CLI display commands and package captures, making these tools much more useful
- D-** No one else will need to respond onsite to handle cables or network devices without fail. AI Insights will handle these situations

automatically

**Answer:**

---

D

## Question 6

---

**Question Type: MultipleChoice**

---

A customer uses another vendor's network infrastructure products but is considering Aruba ESP for their upgrades. However, the customer is concerned about the time it will take to deploy the new network. What should you emphasize about aruba to address this concern?

**Options:**

---

- A-** The aruba client match makes it simple for non-experts to provision client devices to connect to the new network. no
- B-** Aruba central aruba zero touch provisioning makes it faster and easier for non-experts to deploy aruba APs and switches.
- C-** Aruba Composable Fabric Manager (CFM) provides accelerated deployment for non-Aruba APs, switches, and WAN
- D-** Aruba Air Slice allows customers to quickly establish a wireless mesh, extending Wi-Fi connectivity across the campus

**Answer:**

---

D

## Question 7

---

**Question Type:** MultipleChoice

---

You are proposing an aruba instant on solution to a customer who owns a hotel. The hotel does not provide wiring in all areas. Which aruba instant ON feature should you emphasize to meet this need?

**Options:**

---

A- Air slice

B- OWE

C- Smart Mesh

D- Wi-Fi 6

**Answer:**

---

B

## Question 8

---

**Question Type:** MultipleChoice

---

How does Zero Trust Security differ from outdated security practices?

### Options:

---

- A- Zero Trust Security relies on user input because network administrators can no longer be trusted completely
- B- Zero Trust Security assumes every user needs basic network access instead of starting with a default deny posture.
- C- Zero Trust Security focuses on protecting the network perimeter and does not rely on user roles.
- D- Zero Trust Security focuses on protecting resources as opposed to network segments.

### Answer:

---

A

## Question 9

---

**Question Type:** MultipleChoice

---

You are proposing the delivery of Aruba Conlr.il and Aruba ClearPass with a Software-as-a-Service (SaaS) model. What is one business benefit of

**Options:**

---

- A-** It SaaS model that you should explain to the customer?
- B-** It saves costs because the company can reduce the number of APs and switches deployed in the network by offloading functions to the cloud.
- C-** It tote the customer purchase a perpetual license for using the software for as long as the company has Aruba infrastructure devices
- D-** It tells the customer pay a monthly subscription for software and additional IT services, such as implementation, delivery, and even management.
- E-** It simplifies management decisions because it requires the solution to be managed by Aruba from a network operations center (NOC).

**Answer:**

---

D
