Answer:

D

Question 7

Question Type: MultipleChoice

While assessing requirements changes, a business analyst (BA) will determine the formality of the assessment process based on:

Options:

- A- governance approach.

B- business analysis approach.

C- change strategy.

D- potential value.

Answer:

A

Explanation:

Business analysts will determine the formality of the assessment process based on the information available, the apparent importance of the change, and the governance process. Many proposed changes may be withdrawn from consideration or declined before any formal approval is required. A predictive approach may indicate a more formal assessment of proposed changes.

Question 8

Question Type: MultipleChoice

Which technique would the business analyst (BA) consider to show the transformation of data?

Options:

- A- Sequence diagram
- B- Data flow diagram
- C- Data modelling
- D- Flowchart

Answer:

B

Explanation:

A data flow diagram illustrates the movement and transformation of data between externals (entities) and processes. The output from one external or process is the input to another. The data flow diagram also illustrates the temporary or permanent repositories (referred to as data stores or terminators) where data is stored within a system or an organization. The data defined should be described in a data dictionary.
