Question 1

Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

MD-102 Mix Questions IN THIS CASE STUDY

You have a Microsoft 365 subscription that contains two security groups named Group1 and Group2. Microsoft 365 uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You need to assign roles in Intune to meet the following requirements:

* The members of Group1 must manage Intune roles and assignments.

* The members of Group2 must assign existing apps and policies to users and devices.

The solution must follow the principle of least privilege.

Which role should you assign to each group? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Question 2

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MD-102 Mix Questions IN THIS CASE STUDY

You have a computer named Computed that has Windows 10 installed.

You create a Windows PowerShell script named config.psl.

You need to ensure that config.psl runs after feature updates are installed on Computer5.

Which file should you modify on Computer5?

Options:

A- LiteTouch.wsf
B- SetupConfig.ini
C- Unattendb*
D- Unattend.xml

Answer:

B

Explanation:

SetupConfig.ini is a file that can be used to customize the behavior of Windows Setup during feature updates. You can use this file to specify commands or scripts that run before or after the installation process. To run a PowerShell script after a feature update, you can use the PostOOBE parameter in SetupConfig.ini and specify the path to the script file.Reference:[SetupConfig.ini reference]

Question 3

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MD-102 Mix Questions IN THIS CASE STUDY

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers.

You have a computer named Computer1 that runs Windows 10.

From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers.

You need to ensure that you can run the PowerShell commands on the finance department computers from Computer.

What should you do on the finance department computers?

Options:

A- From Windows PowerShell, run the Enable-MMAgent cmdlet.
B- From the local Group Policy, enable the Allow Remote Shell Access setting.
C- From Windows PowerShell, run the Enable-PSRemoting cmdlet.
D- From the local Group Policy, enable the Turn on Script Execution setting.

Answer:

C

Explanation:

Enable-PSRemoting is specifically designed to enable remote PowerShell access. This cmdlet configures the necessary settings on the target computers to allow remote PowerShell connections. The other options are not directly related to enabling remote PowerShell: Enable-MMAgent is used for managing mobile devices. The 'Allow Remote Shell Access' group policy setting is primarily for enabling remote access for command prompt (cmd.exe), not PowerShell. The 'Turn on Script Execution' group policy setting controls whether scripts can run locally on a computer, but it doesn't enable remote PowerShell access. By running Enable-PSRemoting on the finance department computers, you'll ensure that they are ready to receive and execute PowerShell commands from Computer1.

Question 4

Question Type: DragDrop

Case Study: Mix Questions

Mix Questions

MD-102 Mix Questions IN THIS CASE STUDY

You have a Microsoft 365 subscription that contains two users named User1 and User2. You need to ensure that the users can perform the following tasks:

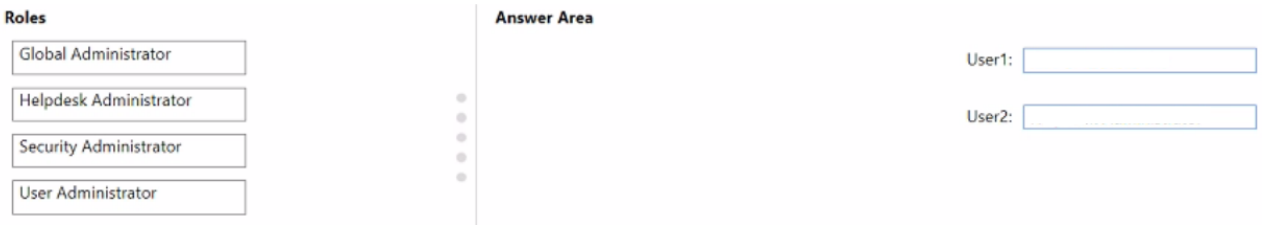

* User1 must be able to create groups and manage users.

* User2 must be able to reset passwords for no administrative users.

The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Question 7

Question Type: Hotspot

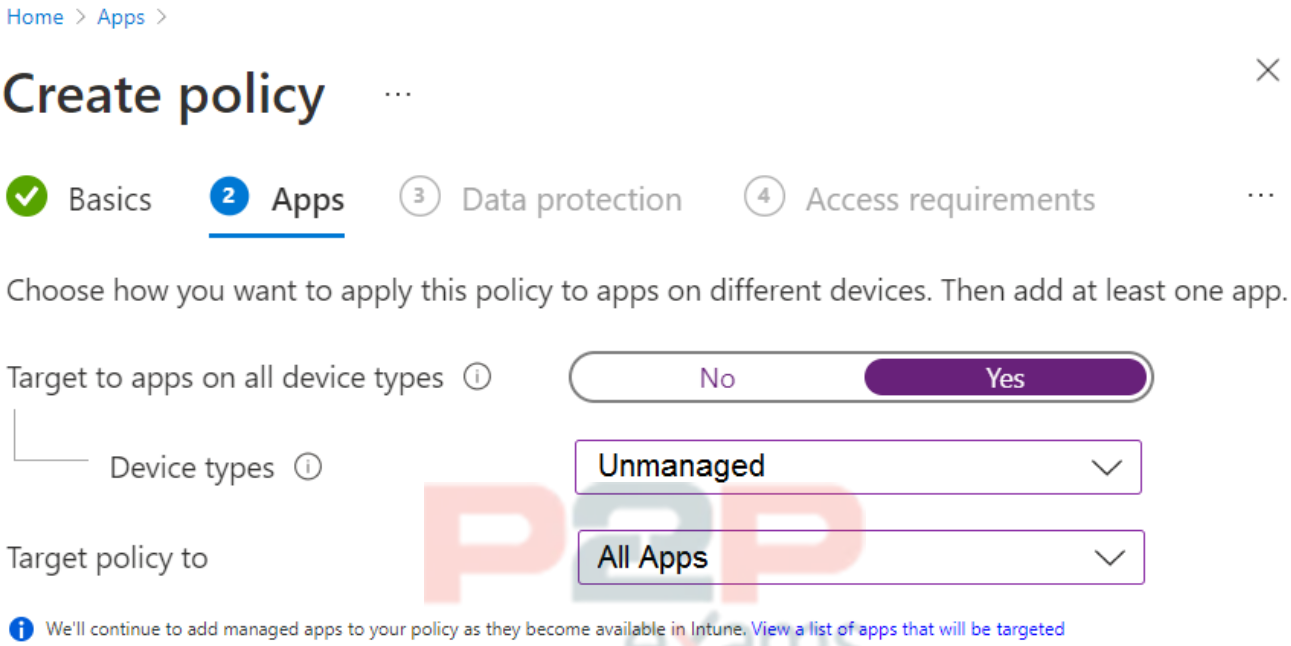

Case Study: Mix Questions

Mix Questions

MD-102 Mix Questions IN THIS CASE STUDY

You have a Microsoft 365 E5 subscription.

You create an app protection policy for Android device named Policy1 as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

To apply Policy1 to an Android device, you must
- install the Company Portal app on the device
- install the Microsoft Authenticator app on the device
- onboard the device to Microsoft Defender for Endpoint
- onboard the device to the Microsoft Purview compliance portal

When Policy1 is assigned, the policy will apply to
- users only
- devices only
- users and devices

Answer:

See the Answer in the Premium Version!

Question 8

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

MD-102 Mix Questions IN THIS CASE STUDY

You have a Windows 10 device named Device! that is joined to Active Directory and enrolled in Microsoft Intune.

Device1 is managed by using Group Policy and Intune.

You need to ensure that the Intune settings override the Group Policy settings.

What should you configure?

Options:

A- a device configuration profile
B- a device compliance policy
C- an MDM Security Baseline profile
D- a Group Policy Object (GPO)

Answer:

A

Explanation:

A device configuration profile is a collection of settings that can be applied to devices enrolled in Microsoft Intune. You can use device configuration profiles to manage Windows 10 devices that are joined to Active Directory and enrolled in Intune. To ensure that the Intune settings override the Group Policy settings, you need to enable the policy CSP setting called MDMWinsOverGP in the device configuration profile. This setting will give precedence to the MDM policy over any conflicting Group Policy settings.Reference:[Use policy CSP settings to create custom device configuration profiles]
