Question 1

Question Type: Hotspot

You are a Dynamics 365 finance developer.

You need to monitor system performance.

Which tools should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer

Answer:

Question 2

Question Type: Hotspot

You are a Dynamics 365 Finance developer.

Users are experiencing slower load times for the All Customers form.

You need to update caching for CustTable to improve data retrieval times.

How should you configure CacheLookup properties? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area	Property	Value
	Set-based caching	<div style="border: 1px solid black; padding: 5px;"> Entire table None Found FoundandEmpty </div>
	Single-record caching	<div style="border: 1px solid black; padding: 5px;"> Found Entire table None SurrogateKey </div>

Question 3

Question Type: Hotspot

You have a Dynamics 365 Finance development environment.

You must add default filters to the fleet management form. You must view only sales that occur in the current sales period and where the Customer name field contains the text Wholesales

You need to configure filtering.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area	Element	Value
	SysQuery method	addRangesFromKeyData range packRangeAndSortOrder mergeFilters
	SysQueryRangeUtil	
	Filter clause	lessThanDate currentDate dateRange monthRange
		contains *Wholesales contains ..Wholesales contains Wholesales* contains *Wholesales*

Question 4

Question Type: OrderList

You are configuring your developer environment by using Team Explorer.

There are several developers working on a customization.

You need to ensure that all code is checked in and then merged to the appropriate branches.

In which order should you perform the actions? To answer, move all actions from the list of action to the answer area and arrange them in the correct order.

NOTE: More than one order of answer is correct. You will receive credit for any of the correct orders you select.

The screenshot shows a drag-and-drop interface. On the left, under the heading "Actions", there is a list of five actions in rectangular boxes: "Connect to the Microsoft Azure DevOps project.", "Map the Microsoft Azure DevOps project to your local developer machine.", "Create a dev branch.", "Create a test branch.", and "Create a main branch.". To the right of this list are two circular arrows, one pointing right and one pointing left. On the right side of the interface, under the heading "Answer area", there are two circular arrows, one pointing up and one pointing down, indicating where the actions should be dropped.

Answer:

Map the Microsoft Azure DevOps project to your local developer machine.

Create

Question 5

Question Type: DragDrop

A company plans to deploy Dynamics 365 Finance.

You need to recommend deployment options for the company.

What should you recommend? To answer, drag the appropriate deployment options of the correct application requirement. Each deployment option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a drag-and-drop question interface. On the left, under the heading "Deployment types", there are three options: "cloud only", "on-premises only", and "cloud or on-premises". In the center, under the heading "Answer Area", there is a list of requirements: "Export data to your own data warehouse.", "Configure SharePoint integration.", "Implement Lifecycle services.", and "Implement Task Recorder.". On the right, under the heading "Deployment type", there are four empty boxes, each labeled "Deployment type".

Question 6

Question Type: DragDrop

A company has a Dynamics 365 Finance environment.

You need to implement indices for new tables.

Which types of indexes should you use? To answer, drag the appropriate types of indexes to the correct requirements. Each type of index may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

NOTE: Each correct selection is worth one point.

Index types	Answer Area	Index type
Primary	Provide a unique key for each record in a table.	Index type
Clustered	Organize the data for a table according to the physical order of the specified column.	Index type
Non-Clustered	Quickly reference data that is found by using a specified set of columns.	Index type
