Question 1

Question Type: MultipleChoice

What is the "sweet spot" for Industry 4.0?

Options:

- A- The "sweet spot" for industry 4.0 is the intersection of URLLC, eMBB and mMTC.
- B- The "sweet spot" for industry 4.0 is a double-digit revenue growth.
- C- The "sweet spot" for industry 4.0 is a deployment strategy for delivering the required capacity and coverage for industrials.
- D- The "sweet spot" for industry 4.0 is the intersection of operational, information and communications technologies.

Answer:

D

Question 2

Question Type: MultipleChoice

What does 5G bring to Industry 4.0? (Choose two.)

Options:

- A-** 5G will generate a huge amount of data and Information Technology will provide the computing platform with analytics and AI.
- B-** 5G provides the connectivity (bandwidth, latency and reliability) needed to exchange data for OT and IT functionality.
- C-** 5G brings nothing to Industry 4.0.
- D-** 5G will generate a huge amount of data with mMTC and IT platforms are expected to suffer from this.

Answer:

A, B

Question 3

Question Type: MultipleChoice

Is it possible for a User Equipment to connect simultaneously to multiple slices in 5G?

Options:

A- No

B- Yes

Answer:

B

Explanation:

imultaneously

Question 4

Question Type: MultipleChoice

What is the role of 5G in meeting the automation needs of Industry 4.0?

Options:

- A- 5G plays a minor role on Industry 4.0 because the requirements are mainly focused on mMTC and IoT.
- B- 5G requirements for Industry 4.0 are mainly focused on Ultra high bandwidth needs.
- C- 5G plays an important role on Industry 4.0 because it enables the cloud automation with baremetal platforms.
- D- 5G requirements for Industry 4.0 are mainly focused on ultra low latency characteristics but also from high throughput and massive connectivity.

Answer:

D

Question 5

Question Type: MultipleChoice

Which of the following is not a benefit of Network Slicing?

Options:

- A- Priority between different flows
- B- Privacy and segmentation between flows

C- Recovery of network flows when they fail

D- Differentiated QoS flows, for different services

Answer:

C

Question 6

Question Type: MultipleChoice

When considering Cloud and Transport orchestration, evaluate whether the following statement is true or false: NFVO is to Cloud what SDN is to Transport.

Options:

A- False

B- True

Answer:

A
