Question 1

Question Type: MultipleChoice

Refer to the Exhibit.

Refer to the table below:

Which ADM Phase does this describe?

Options:

A) Phase A

B) Phase B

C) Preliminary Phase

D) Phase C

Answer:

B

Explanation:

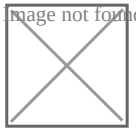
Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

Question 2

Question Type: MultipleChoice

Refer to the Exhibit.

Consider the following ADM phases objectives.



Which phase does each objective match?

Options:

A) 1F-2G-3F-4F

B) 1E-2F-3E-4G

C) 1G-2E-3F-4E

D) 1F-2F-3E-4G

Answer:

B

Explanation:

1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F: To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented

Question 3

Question Type: MultipleChoice

What is used lo structure architectural information in an orderly way so that it can be processed to meet stakeholder needs?

Options:

A) A Stakeholder Map

B) An Architecture Framework

C) Content Metamodel

D) An EA Library

Answer:

B

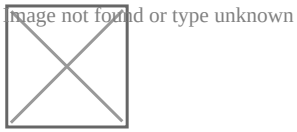
Explanation:

An Architecture Framework is used to structure architectural information in an orderly way so that it can be processed to meet stakeholder needs. An Architecture Framework provides a common language and taxonomy for describing architectures; a set of tools and techniques for creating architectures; a method for defining views and viewpoints for different stakeholders; a metamodel for representing architecture artifacts; a repository for storing and managing architecture artifacts; and a governance framework for controlling architecture development and evolution. Reference: The TOGAF Standard | The Open Group Website, Section 2 Core Concepts.

Question 4

Question Type: MultipleChoice

Refer to the Exhibit.



Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as item 1?

Options:

A) Conducts implementation planning for the architecture defined in previous phases

B) Provides architectural oversight for the implementation

C) Operates the process of managing architecture requirements

D) Establishes procedures for managing change to the new architecture

Answer:

A

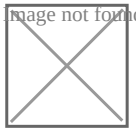
Explanation:

The phase of the ADM labeled as item 1 is Phase F: Migration Planning. This phase conducts implementation planning for the architecture defined in previous phases by creating an Architecture Roadmap and a detailed Implementation and Migration Plan. This phase also identifies and groups major work packages, transition architectures, projects, and dependencies. Reference: https://pubs.opengroup.org/architecture/togaf9-doc/arch/chap19.html

Question 5

Question Type: MultipleChoice

Refer to the Exhibit.



Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as item 1?

Options:

A) Conducts implementation planning for the architecture defined in previous phases

B) Provides architectural oversight for the implementation

C) Operates the process of managing architecture requirements

D) Establishes procedures for managing change to the new architecture

Answer:

A

Explanation:

The phase of the ADM labeled as item 1 is Phase F: Migration Planning. This phase conducts implementation planning for the architecture defined in previous phases by creating an Architecture Roadmap and a detailed Implementation and Migration Plan. This phase also identifies and groups major work packages, transition architectures, projects, and dependencies. Reference: https://pubs.opengroup.org/architecture/togaf9-doc/arch/chap19.html

Question 6

Question Type: MultipleChoice

What is used lo structure architectural information in an orderly way so that it can be processed to meet stakeholder needs?

Options:

A) A Stakeholder Map

B) An Architecture Framework

C) Content Metamodel

D) An EA Library

Answer:

B

Explanation:

An Architecture Framework is used to structure architectural information in an orderly way so that it can be processed to meet stakeholder needs. An Architecture Framework provides a common language and taxonomy for describing architectures; a set of tools and techniques for creating architectures; a method for defining views and viewpoints for different stakeholders; a metamodel for representing architecture artifacts; a repository for storing and managing architecture artifacts; and a governance framework for controlling architecture development and evolution. Reference: The TOGAF Standard | The Open Group Website, Section 2 Core Concepts.

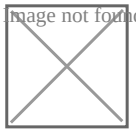
Question 7

Question Type: MultipleChoice

Refer to the Exhibit.

Consider the following ADM phases objectives.

Image not found or type unknown



Which phase does each objective match?

Options:

A) 1F-2G-3F-4F

B) 1E-2F-3E-4G

C) 1G-2E-3F-4E

D) 1F-2F-3E-4G

Answer:

B

Explanation:

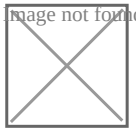
1E: To identify delivery vehicles (projects programs portfolios) that will deliver the Target Architecture 2F: To confirm readiness and ability to undergo change 3E: To determine whether an incremental approach is required and if so identify Transition Architectures that will deliver continuous business value 4G: To perform appropriate governance functions while the solution is being implemented

Question 8

Question Type: **MultipleChoice**

Refer to the Exhibit.

Refer to the table below:



Which ADM Phase does this describe?

Options:

A) Phase A

B) Phase B

C) Preliminary Phase

D) Phase C

Answer:

B

Explanation:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.
