Question 1

Question Type: MultipleChoice

In which folder should you put custom mediator in the EI distribution?

Options:

- A- If your Class mediator is a regular non-OSGI JAR file, copy it into the <EI_HOME>/repository/classmediators directory.
- B- Both a and c are correct.
- C- If you develop your mediator as a OSGI bundle, copy jar file into <EI_HOME>/dropins directory.
- D- If your mediator is a regular non-OSGI JAR file, copy it into the <EI_HOME>/lib directory.

Answer:

D

Question 2

Question Type: MultipleChoice

Select the INCORRECT statement regarding ESB connectors.

Options:

- A-** Integration is much faster than using sequences and proxy services.
- B-** Connectors cannot be directly added and removed to the runtime, so after deploying them you have to restart the servers.
- C-** No extensive knowledge of the source system is required to use ESB connectors.
- D-** 150+ connectors are available, and WS02 is continuously adding more to the connector collection.

Answer:

D

Question 3

Question Type: MultipleChoice

Which statement is FALSE about ESB connectors?

Options:

- A-** Every connector is self-contained and independent of ESB code.
- B-** A connector is a ready-made convenient tool to reach publicly available web APIs.
- C-** Hardcoding usernames and passwords in the connector configuration is required to connect to external public APIs that require authentication.
- D-** Connectors provide dynamic tooling support with EI tooling.

Answer:

C

Question 4

Question Type: MultipleChoice

Identify the most suitable extension point to be used to implement the following scenario: At a specific time of the day, you need to read a text file at a specified location and place orders for stocks that are given in the text file.

Options:

- A- File Connector
- B- Tasks
- C- Custom mediator
- D- Script mediator

Answer:

D

Question 5

Question Type: MultipleChoice

In which of the following cases will an endpoint move to the suspended state?

Options:

- A- When retry count is 0.
- B- When the suspend timeout is reached.
- C- When there is a response from the endpoint.

D- When the retry count is a positive integer.

Answer:

C

Question 6

Question Type: MultipleChoice

Which statement about large file transfer using ESB profile is true?

Options:

- A-** To enable binary file transfer, you must enable the message builder and formatter for the relevant content type in axis2.xml.
- B-** You can enable streaming within your ESB profile configuration using a parameter.
- C-** All of the above.
- D-** Files can be transferred as binary files using streaming to reduce processing and memory requirements.

Answer:

D
