Question 1

What is a characteristic of synchronous and asynchronous API calls?

Options:

A- Synchronous API calls must always use a proxy server.

B- ASynchronous communication uses more overhead for client authentication

C- Synchronous communication is harder to follow and troubleshoot

D- Synchronous API calls wait to return until a response has been received

Answer:

D

Question 2

Which two initial actions should be taken when exploring automation capabilities for ACI? (Choose Two)

Options:

A- Write scripts that leverage the Python Standard Library

B- Look for an open-source package or SDK

C- Use the API Inspector and test API Calls

D- Develop an open-source package or SDK

E- Use the ncclient command to explore the NETCONF capabilities

Answer:

B, C

Question 3

Question Type: MultipleChoice

Which two application isolation options are available when Kubernetes is deployed with the ACI CNI plug-in? (Choose two.)

Options:

A- Process Isolation

B- Namespace Isolation

C- Cluster Isolation

D- Server Isolation

E- VM Isolation

Answer:

B, C

Question 4

Question Type: MultipleChoice

Refer to the exhibit.

```
1   dnQuery = DnQuery('uni/tn-companyXYZ')
2   dnQuery.subtree = 'parent'
3   tenantMo = moDir.query(dnQuery)
4   defaultBDMo = tenantMo.BD['default']
```

Which action fixes the code to access a child managed object?

Options:

A- Delete line 2.

B- Change dnQuery to classQuery in line 1.

C- Move line 2 to the last line.
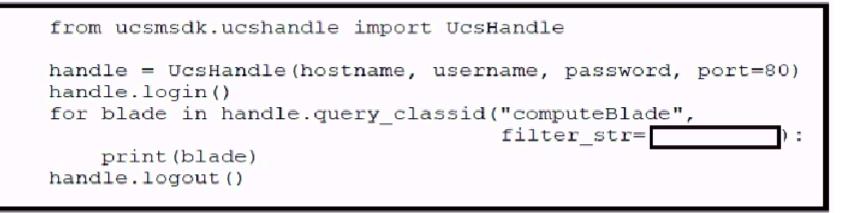

D- Change parent to children in line 2.

Answer:

D

Question 5

Question Type: **MultipleChoice**

Refer to the exhibit.

```
from ucsmsdk.ucshandle import UcsHandle

handle = UcsHandle(hostname, username, password, port=80)
handle.login()
for blade in handle.query_classid("computeBlade",
                                    filter_str=[          ]):
        print(blade)
handle.logout()
```

When Cisco UCS is configured, which filter must be added to the str_filter string to retrieve all discovered compute blades with two CPUs?

Options:

A- (num_of_cpus eq 2) and (discovery eq complete)

B- (num_of_cpus. 'x2\ type-sum') and (discovery, 'complete1, type='sum')

C- (num_of_cpus eq <2) and (discovery eq more)

D- (num_of_cpus. '2', type-eq') and (discovery, 'complete', type-'eq')

Answer:

A

Question 6

Which two network protocols does Cisco NX-OS iPXE support? (Choose two.)

Options:

A- IPv6

B- SFTP

C- SSH

D- IPv4

E- UNFS

Answer:

A, D
