## Question 5

---

**Question Type:** MultipleChoice

---

Refer to the exhibit.

An administrator notices that the Rack View of Avaya Orchestrator is highlighted with a Red X on the graphical representation of the rack.

What does this indicate?

### Options:

---

- A- At least 50% of the hosts in the rack contain a service which is in critical state.
- B- The rack has a front door that is currently unlocked.
- C- The rack is currently unreachable.
- D- At least one of the hosts in the rack contains a service which is in critical state.

### Answer:

---

D

### Explanation:

---

<https://downloads.avaya.com/css/P8/documents/101061680> (16)

## Question 6

---

### Question Type: MultipleChoice

---

An Avaya Orchestrator administrator has been tasked with getting a copy of the Temperature Values chart for a Server. When doing this in the past, the administrator has navigated to the Compute Group Dashlet-Host

Up-Host IP Address-Performance Chart. However, the Temperatures Values chart cannot be found.

What is potentially causing this issue?

**Options:**

---

- A-** The SNMP credentials for the Server's thermostats subsystems are incorrect.
- B-** The IP address chosen is of the ESXi host, not the iLO interface.
- C-** The Host is currently unresponsive.
- D-** The Temperatures Values are only available for VSP switches and Storage systems.

**Answer:**

---

C

## Question 7

---

**Question Type:** MultipleChoice

---

Refer to the exhibit.

# AVAYA Orchestrator

## ▼ Quick View

- Home Dashboard
- All Service Problems
- All Host Problems

## ▼ Details

- Service Status
- Host Status

## ▼ Graphs

- Graph Explorer
