Question 1

Question Type: MultipleChoice

Alfresco Process Services uses the 3rd party library Aspose to transform documents. Which statements are correct regarding Aspose? (Choose two.)

Options:

- A-** When activiti-app is installed with installer, no manual action is needed to deploy an Aspose license to fully function.
- B-** When activiti-app is installed using the war distributions, an Aspose license named "transform.lic" has to be deployed manually.
- C-** Regardless of how activiti-app is installed, Aspose does not require a license to be deployed in order to fully function.
- D-** When activiti-app is installed using the war distributions, no manual action is needed to deploy an Aspose license to fully function.
- E-** Regardless of how activiti-app is installed, the path to the required Aspose license can be configured in the activiti-admin.properties file.

Answer:

B, E

Question 2

Question Type: MultipleChoice

By default, into which of the following filesystem locations can the Alfresco Process Services' license file be uploaded? (Choose two.)

Options:

- A-** In the application container classpath.
- B-** In the license subfolder of the installation directory.
- C-** In the location defined by the \$USER_HOME environment variable.
- D-** In the location defined by the \$USER_HOME environment variable.
- E-** In the filesystem location defined by \$USER_HOME/.activiti/enterprise-license/

Answer:

A, E

Question 3

Question Type: MultipleChoice

You notice that once you have installed activiti-app and started using it that you have the following directories:

act_data/activiti-elastic-search-data and act_data/data.

If you need to move the data used by activiti-app of to another disk because you are low on disk space, which statement is correct?

Options:

- A-** The act_data/activiti-elastic-search-data directory must be copied over to the new location and update the path in the activiti-app.properties.
- B-** The act_data/data directory does not need to be copied over since, it will repopulate from the database as long as the path in the activiti-app.properties is updated.
- C-** The act_data/data directory has sub directories which you can copy to multiple different disks and update the paths in the activiti-app.properties.
- D-** The act_data/data and act_data/activiti-elastic-search-data both must be copied over to the new location and update the path in the activiti-app.properties.
- E-** The act_data/data directory must be copied to the new location and update the path in the activiti-app.properties.

Answer:

B
