Answer:

C

Question 2

Question Type: MultipleChoice

Which rule engine execution mode is designed to optimize a large numbers of objects?

Options:

- A- Faslpalh
- B- RetePlus
- C- Sequential
- D- Ciassic Engine

Answer:

B

Explanation:

https://www.ibm.com/support/knowledgecenter/en/SSQP76_8.9.0/com.ibm.odm.dserver.rules.designer.run/optimizing_topics/tpc_opt_perfscalability

Question 3

Question Type: MultipleChoice

GoodCreditLoans is a financial company that wants to create an automated loan approval application. They currently have an application that uses hard-coded logic and manual checks to assess loan applications, generate payment reminders, send marketing emails to potential clients, and create monthly sales reports. The existing application uses these entities: MarketingContact, Equipment, Loan, Reminder, Applicant, SalesReport.

Here are some example rules harvested during rule discovery for the new automated loan approval application:

```
If the amount of the loan is less than $10,000,000.00 then the loan is rejected
```

```
If the amount of the loan is equal to or more than $10,000,000.00 and the applicant's monthly salary is greater than $175,000.00 then the loan is accepted
```

What two entities are needed to write the loan approval business rules? (Choose two.)

Options:

A- Loan

B- Reminder

C- Applicant

D- SalesReport

E- MarketingContact

Answer:

B, C

Question 4

Question Type: MultipleChoice

Ruleset parameters can be defined for a ruleset or decision service, and the parameters can have different directions such as IN, OUT, or IN_OUT. If the decision service being invoked includes all three different types of parameters, which statement is true?

Options:

- A-** Only the input parameter needs to be provided in the request.
- B-** Only the input-output parameter need to be provided in the request.
- C-** Both output and input-output parameters need to be provided in the request.
- D-** Both input and input-output parameters have to be provided in the request.

Answer:

A

Question 5

Question Type: MultipleChoice

For a request, which object is used for a Java execution of a Rule session?

Options:

- A- IlrRequest
- B- rule Request
- C- restAPIRequest
- D- IlrSessionRequest

Answer:

D

Question 6

Question Type: MultipleChoice

Which of the following activities can be performed through the RES REST APIs?

Options:

- A- Executing a ruleset only
- B- Starting and stopping the RES server
- C- Deploying new artifacts and executing rulesets
- D- Managing deployed artifacts such as ruleapps, XOMs, libraries, and execute rulesets

Answer:

D

Explanation:

https://www.ibm.com/support/knowledgecenter/en/SSQP76_8.9.2/com.ibm.odm.dserver.rules.res.managing/topics/con_res_restapi_rsrcmng_intro.h
