Question 1

Question Type: MultipleChoice

When designing an EMC RecoverPoint environment, what must be taken into account when a site consists of multiple VMAX splitters or multiple RecoverPoint clusters?

Options:

- A-** A total of 16 gatekeepers are required for each VMAX splitter/RecoverPoint cluster combination.
- B-** All gatekeepers must be connected to each VMAX splitter/RecoverPoint cluster combination with fixed paths.
- C-** A total of eight gatekeepers are required for each VMAX splitter/RecoverPoint cluster combination.
- D-** When the VMAX splitter/RecoverPoint cluster is connected through Fibre Channel only two gatekeepers must be used.

Answer:

A

Question 2

Question Type: MultipleChoice

When is the Open Replicator RecoverPoint session created for each replica volume in the Consistency Group (CG)?

Options:

- A- CG is put into Image Access mode
- B- CG is created
- C- CG is enabled
- D- CG is taken out of Image Access mode

Answer:

A

Question 3

Question Type: MultipleChoice

When is the Open Replicator RecoverPoint session created for each production volume in the Consistency Group (CG)?

Options:

- A- CG is enabled
- B- CG is created
- C- LUN is attached to the splitter
- D- LUN is added to an RSET

Answer:

A

Question 4

Question Type: MultipleChoice

Which ports from a VPLEX Metro system must be zoned to the RPAs in order to install the VPLEX write splitter?

Options:

- A- FE and BE ports

- B-** FE ports only
- C-** BE ports only
- D-** FA ports

Answer:

A

Question 5

Question Type: MultipleChoice

When creating a Consistency Group (CG), what is true of RecoverPoint/SE only?

Options:

- A-** All volumes of the array are displayed in the available volumes list.
- B-** Journal Compression may be used.
- C-** The CG must be created from Unisphere for RecoverPoint.
- D-** Journal volumes may be automatically provisioned.

Answer:

A

Question 6

Question Type: MultipleChoice

An organization is hosting storage protection solutions for multiple companies. This solution is accomplished by the hosting organization's ability to consolidate data to a single VNX platform.

How many RecoverPoint clusters can be used in this environment?

Options:

A- 6 clusters, assuming each LUN is attached to only one cluster at a time

B- 6 clusters, assuming only vRPAs are used

C- 8 clusters, assuming each LUN is replicated across the clusters

D- 8 clusters, assuming each LUN is attached to only one cluster at a time

Answer:

A

Question 7

Question Type: MultipleChoice

A large data center is hosting storage protection solutions for multiple companies. This solution is accomplished by the hosting organization's ability to consolidate data to an environment with two VNX arrays.

How many RecoverPoint clusters can be used in this environment?

Options:

- A- 12 clusters, assuming each LUN is attached to only one cluster at a time
- B- 6 clusters, assuming only vRPAs are used
- C- 12 clusters, assuming each LUN is replicated across the clusters
- D- 6 clusters, assuming each LUN is attached to only one cluster at a time

Answer:

A

Question 8

Question Type: MultipleChoice

For a RecoverPoint system with multiple clusters, how many gatekeepers are needed for each VMAX splitter/RecoverPoint-cluster combination?

Options:

- A- 2
- B- 8
- C- 4
- D- 16

Answer:

D

Question 9

Question Type: MultipleChoice

An existing environment is replicating using RecoverPoint/CL. A new VPLEX has just been installed and the VPLEX splitter has been added to the RecoverPoint configuration. The administrator can see the VPLEX splitter in Unisphere for RecoverPoint but cannot obtain management, installation, and integration information about volume types.

What could cause this issue?

Options:

- A-** RecoverPoint and VPLEX certificates have not been exchanged.
- B-** The VPLEX certificate has expired.
- C-** VPLEX splitter is only compatible with RecoverPoint/EX.
- D-** RPAs have not been added to a Storage View.

Answer:

A

Question 10

Question Type: MultipleChoice

In a VPLEX splitter environment, where is the splitter process running?

Options:

A- VPLEX directors

B- VPLEX FE ports

C- VPLEX BE ports

D- VPLEX volumes

Answer:

A

Question 11

Question Type: MultipleChoice

What is a benefit of integrating RecoverPoint with VMware Site Recovery Manager (SRM)?

Options:

- A-** Enables coordinated failover of virtual machines and their storage
- B-** Eliminates hardware dependencies when using heterogeneous storage with VMware
- C-** Enables replication of individual virtual machines without the need to replicate an entire VMFS volume
- D-** Enables full protection of VMware ESXi servers

Answer:

A
