Question 1

Question Type: MultipleChoice

What are two benefits of IBM Spectrum Copy Data Management in terms of copy services orchestration?

Options:

- A- Easy DevOps environment creation
- B- Automatically encrypts in-flight data to the secondary site
- C- Automate storage copy services tasks using SLA Policies
- D- Automatically discover and catalog all SAN objects
- E- Easy reporting of file system occupancy for all servers

Answer:

C, E

Question 2

Question Type: MultipleChoice

When evaluating the customer environment, which three tasks can Arxscan assist with?

Options:

- A- SAN Performance
- B- IBM Spectrum Scale Performance
- C- Network Performance
- D- Storage Capacity
- E- Database Performance
- F- Security Vulnerabilities

Answer:

B, D, E

Question 3

Question Type: MultipleChoice

How can governance with IBM Spectrum Discover help to mitigate risk?

Options:

- A- manages immutable tags for classification retention
- B- obfuscation of personally identifiable information (Pit) in queries from certain sources
- C- automatically identify suspicious data access patterns
- D- automatically identify certain kinds of personally identifiable information (PII)

Answer:

C

Question 4

Question Type: MultipleChoice

Which IBM storage software product can be used to migrate data non-disruptively from one storage array to another storage array?

Options:

- A- IBM Spectrum Protect
- B- IBM Spectrum Virtualize
- C- IBM Spectrum Discover
- D- IBM Spectrum Control

Answer:

B

Question 5

Question Type: MultipleChoice

What is the state when a file exists on both GPFS file system and tape managed by IBM Spectrum Archive?

Options:

- A- migrated
- B- offline
- C- resident

D- premigrated

Answer:

A

Question 6

Question Type: MultipleChoice

Which cloud object storage service can be used as the target of a tiering storage rule in IBM Spectrum Protect?

Options:

A- Oracle Object Storage

B- IBM Cloud Object Storage using the Cloud API

C- OpenStack Swift

D- IBM Cloud Object Storage using the S3 API

Answer:

C

Explanation:

<https://www.ibm.com/support/pages/ibm-spectrum-protect-cloud-object-storage-support>

Question 7

Question Type: MultipleChoice

Which IBM storage solution provides a geographically dispersed file system as a single namespace?

Options:

- A- IBM Spectrum Scale
- B- IBM Spectrum Virtualize
- C- IBM SAN Volume Controller
- D- IBM Elastic Software

Answer:

A

Explanation:

<https://www.ibm.com/downloads/cas/GQN4XN15>

Question 8

Question Type: MultipleChoice

A customer is looking to improve their AI and Analytics ability by creating a search bar with more advanced search pane to help users quickly find subsets of records. They need to control who has access to which records and need a solution that provides role-based access control.

Which solution from IBM can address the customer's needs?

Options:

- A- IBM Spectrum Protect Plus
- B- IBM Spectrum Control
- C- IBM Spectrum Discover
- D- IBM Spectrum Scale

Answer:

C

Explanation:

IBM Spectrum Discover provides both a search bar and a more advanced search pane to help users quickly find subsets of records that are indexed. Search results are displayed in a columnar table that contains information that is correlated to search criteria. What a user can see or not see is determined by using role-based access control (RBAC). All these features enable a strong decision-making capability around the management of the data by using the metadata about the data or data from the content files in a simple searchable format.

Question 9

Question Type: MultipleChoice

A customer is looking for a storage tool that can help them identify volumes that have not been accessed for a period of time, which can indicate orphaned VMs. Which feature in IBM Storage Insights can provide them the insights?

Options:

- A- VM node inventory
- B- tier recommendation
- C- reclamation recommendation
- D- capacity usage

Answer:

B

Question 10

Question Type: MultipleChoice

IBM Spectrum Protect Plus integrates with which other IBM Spectrum software product to safeguard data via a physical air gap?

Options:

- A- IBM Spectrum Scale
- B- IBM Spectrum Control
- C- IBM Spectrum Archive
- D- IBM Spectrum Protect

Answer:

D

Question 11

Question Type: MultipleChoice

Kubernetes Backup Support protects only persistent storage that was allocated by a storage plug-in that supports which feature?

Options:

- A- Storage Cloud Interface

- B- Storage Container Interface
- C- Container Storage Interface
- D- Container Kubernetes Interface

Answer:

C

Explanation:

Kubernetes Backup Support protects only persistent storage that was allocated by a storage plug-in that supports the Container Storage Interface (CSI).
