Question 1

The _____ principle encourages services within the boundary of a specific service inventory to share messages based on the same data models. This practice directly supports the _____ principle, which is concerned with designing services so that they can be effectively and repeatedly aggregated into different solutions. Select the correct answer.

Options:

A- Service Abstraction, Service Autonomy

B- Service Autonomy, Service Composability

C- Standardized Service Contract, Service Composability

D- None of the above.

Answer:

C

Question 2

The service-orientation principle primarily concerned with ensuring the runtime behavioral predictability of a service is: Select the correct answer.

Options:

A- Service Prediction

B- Service Loose Coupling

C- Service Abstraction

D- None of the above.

Answer:

D

Question 3

Question Type: MultipleChoice

A service-oriented solution can be comprised of which of the following core architectural elements? Select the correct answer.

Options:

A- messages

B- services

C- contracts

D- All of the above.

Answer:

B

Question 4

Question Type: MultipleChoice

The Service Reusability principle can _____ demands on infrastructure because services that are reused will typically have _____ security, performance, and reliability requirements. Select the correct answer.

Options:

A- increase, reduced

B- decease, reduced

C- eliminate, no

D- None of the above.

Answer:

D

Question 5

Question Type: **MultipleChoice**

A composition member is a service that participates in a service composition by being composed by another service. Select the correct answer.

Options:

A- True

B- False

Question 6

Question Type: MultipleChoice

The _____ principle can be applied together with the _____ principle and the _____ principle to establish a service contract that conforms to design standards, does not impose negative dependencies upon service consumers, and does not reveal unnecessary information about its underlying implementation. Select the correct answer.

Options:

A- Standardized Service Contract, Service Statelessness, Service Reusability

B- Standardized Service Contract, Service Abstraction, Service Autonomy

C- Standardized Service Contract, Service Loose Coupling, Service Reusability

D- None of the above.

Answer:

D
