Question 1

Question Type: MultipleChoice

Which two features must be configured in order to manage storage with SmartTier? (Choose two.)

Options:

- A- the placement class tag
- B- SmartTier management at disk level
- C- SmartTier with solid state disks
- D- VxFS single volume file system
- E- SmartTier management at file level

Answer:

A, D

Question 2

Question Type: MultipleChoice

The disk group appdg is imported onto host01 using the vxvg -t import appdg command. Volumes have been started and file systems mounted. The system is then gracefully rebooted.

What happens to the appdg disk group after host01 has restarted?

Options:

- A-** The appdg disk group remains deported; any host that can access the appdg disk group can import it.
- B-** The appdg disk group remains deported; only host01 can import the disk group using the vxvg import appdg command.
- C-** The appdg disk group is automatically imported; all volumes in the disk group are automatically started.
- D-** The appdg disk group is automatically imported without starting the volumes or mounting the file systems.

Answer:

A

Question 3

Question Type: MultipleChoice

Which Veritas InfoScale for UNIX/Linux utility can an administrator use to upgrade the license key when a product or older license is already present on the system?

Options:

A- vxleyless

B- vxlicense

C- vxlicinstupgrade

D- vxlicrep

Answer:

C

Question 4

Question Type: MultipleChoice

How many Veritas file system cache areas are supported by SmartIO?

Options:

- A- one cache of each cache type on each system
- B- one for read caching and one for write caching on each system
- C- one for read caching and one for write caching for each file system
- D- one for read caching and one for write-back caching for each file system

Answer:

B

Question 5

Question Type: MultipleChoice

An administrator has configured replication using Veritas Volume Replicator between two sites. The replication mode is set to asynchronous and the replication status is consistent and connected.

The performance of which component impacts the application write performance?

Options:

- A- write performance of the primary SRL volume
- B- write performance of the secondary SRL volume
- C- write performance of the data volumes at the primary site
- D- network latency between the primary and the secondary sites

Answer:

C

Question 6

Question Type: MultipleChoice

How many days does an administrator have to either enter a valid license key or register a system with Veritas InfoScale Operations Management server if they have chosen to use keyless licensing during the installation of Veritas InfoScale Storage for UNIX/Linux?

Options:

A- 30

B- 60

C- 90

D- 45

Answer:

B

Question 7

Question Type: MultipleChoice

Which command configures a disk for use by InfoScale Storage for UNIX?

Options:

A- vxdiskconfig

B- vxdisksetup

C- vxdg

D- vxdmpadm

Answer:

B

Question 8

Question Type: MultipleChoice

Which command is used to display current file system I/O parameters for a Veritas file system?

Options:

A- vxtune

B- vxtunefs

C- vxstat

D- fsadm

Answer:

B

Question 9

Question Type: MultipleChoice

An administrator needs to provide storage for a critical database application that maximizes both database performance and protection against data loss.

Which storage configuration should the administrator select?

Options:

- A- RAID-5
- B- striping plus mirroring (mirrored-stripe or RAID-0+1)
- C- mirroring (RAID-1)
- D- mirroring plus striping (striped-mirror or RAID-1+0)

Answer:

D

Question 10

Question Type: MultipleChoice

Dynamic Multi-Pathing for VMware has an operating mode which enables the pooling of locally attached devices such as SSDs at the ESXi host layer.

Which feature should an administrator configure on the ESXi host running Veritas InfoScale?

Options:

A- SmartIO

B- SmartDisks

C- SmartPool

D- SmartMove

Answer:

C
