Question 1

Question Type: DragDrop

image not found or type unknown

Refer to the exhibit. A developer is creating a Python script to obtain a list of HTTP servers on a network named office_east by using the Cisco Meraki API. The request has these requirements:

- * Must time out if the response is not received within 2 seconds.
- * Must utilize client certificates and SSL certificate verification.
- * Must utilize basic authentication that uses a username of admin and a password of cisco.
- * Must save the response to an object named response.

Drag and drop the code snippets from the bottom onto the blanks in the code to meet the requirements. Not all options are used.
