Question 1

Question Type: MultipleChoice

Which of the following networks is NOT required by CMM?

Options:

A- An OAM network for CMM management

B- An internal network for inter-VM communication

C- A data switch fabric for carrying 3G data plane traffic between IPDS and IPPS.

D- An external network for communication with external entities.

Answer:

D

Question 2

Question Type: MultipleChoice

Which of the following statements regarding CMM internal network is FALSE?

Options:

A- It is a layer 2 network.

B- It is connected to all CMM VMs.

C- It is used for communication between CMM VMs.

D- It requires a customer provided subnet address.

Answer:

D

Question 3

Question Type: **MultipleChoice**

Which of the following statements regarding CMM scaling is TRUE?

Options:

A- DBS VMs can scale out in steps of a single VM.

B- NECC VMs can scale out in steps of a single VM.

C- CPPS VMs can scale out in steps of a single VM.

D- IPDS VMs can scale out in steps of a single VM.

Answer:

C

Question 4

Question Type: **MultipleChoice**

Which of the following lifecycle management operations is NOT supported by CMM?

Options:

A- Healing of all CMM VMs

B- Scale out of CPPS, PAPS, and IPPS VMs

C- Scale in of NECC and IPDS VMs

D- Instantiation of all CMM VMs

Answer:

C

Question 5

Question Type: MultipleChoice

Which of the following Nokia products is used to perform lifecycle management operations on CMM?

Options:

A- CloudBand infrastructure software (CBIS)

B- CloudBand application manager (CBAM)

C- CloudBand network director (CBND)

D- Network services platform (NSP)

Answer:

B

Question 6

Question Type: MultipleChoice

Which of the following best describes the function of CBAM in the Nokia CPC?

Options:

A- Provides the EMS function for element management of individual CPC components.

B- Provides the NFVO function to support the definition and management of end-to-end services.

C- Provides the VNFM function to manage the life cycle of VNFs including deployment and scaling.

D- Provides the VIM function to manage the compute and network resources required by VNFs.

Answer:

C

Question 7

Question Type: MultipleChoice

Which of the following provides the virtual hardware environment for the guest OS on a Linux system?

Options:

A- libvirt

B- QEMU

C- virsh

D- ESXi

Answer:

B

Question 8

Question Type: MultipleChoice

Which of the following OpenStack projects provides networking services to VMs?

Options:

A- Neutron

B- Nova

C- Keystone

D- Horizon

Answer:

A

Question 9

Question Type: **MultipleChoice**

Which of the following statements about interface redundancy with OVS is FALSE?

Options:

A- OVS provides redundancy through a Linux bonded interface on the hypervisor.

B- Guest VMs have two virtual NICs connected to OVS through a Linux bridge.

C- Ethernet frames are sent between the redundant interfaces to verify connectivity.

D- OVS connects to two physical ports connected to distinct leaf switches.

Answer:

C
