# Question 1

---

## Question Type: MultipleChoice

---

The client provided these business requirements:

- \* The B2C Commerce platform will integrate with the client's Order Management System (OMS).
- \* The OMS supports Integration us-no legacy RPC style SOAP services.
- \* The OMS is hosted on client s infrastructure.

What is the right cartridge folder to place the WSDL provided for the OMS service?

### Options:

---

- A- /cartridge/webreferences2
- B- /cartridge/webreferences
- C- /cartridge
- D- /cartridge/services

### Answer:

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

Northern Trail Outfitters (NTO) operate 200 physical stores. NTO has products that are available in some of the physical stores and not available in others. The closest physical store is determined based on customer's post zip code when they are shopping online. Only the products that are available in the customer's closest physical store should be presented to the customer to the search results.

What are the two feasible technical approaches to meet these requirements?

Choose 2 answers

### Options:

---

- A-** Create a separate shipping method per physical store. Use post/zip code to determine the applicable shipping method. Show only the products that are not excluded from the shipping method.
- B-** Create a separate category per physical store use post/zip code with a mapping to determine the relevant category. Show only the products from this category.
- C-** Create a separate site per physical store. Use post/zip code to redirect the customer to the relevant site. Show the products from the site navigation catalog.
- D-** Create a separate pricebook per physical store. Use post/zip code to activate this pricebook through a customer group. Show only the products with price by applying price refinement.

**Answer:**

---

A, D

## Question 3

---

**Question Type: MultipleChoice**

---

The Architect has been presented with a requirement from the business to implement a new LINK cartridge. The current site is built on the Storefront Reference Architecture, and the LINK cartridge is certified for Pipelines and Controllers. On review, the Architect notes that the Jobs are all created in Pipelines.

How should the Architect implement that cartridge to make sure the required jobs runs property?

**Options:**

---

- A-** The Job Pipelines must be updated to use SiteGenesis Controllers.
- B-** The job Pipelines must be removed and recreated with scripts.
- C-** The job Pipelines must be updated to use SFRA Controllers.
- D-** The job Pipelines must be updated to work as custom job steps.

**Answer:**

---

D

## Question 4

---

**Question Type:** MultipleChoice

---

Northern Trail Outfitters uses an Order Management system (OMS), which creates an order tracking number for every order 24 hours after receiving it. The OMS provides only a web-service interface to get this tracking number. There is a job that updates this tracking number for exported orders, which were last modified yesterday.

Part of this jobs code looks like the following:

Based on the above description and code snippet, which coding best practice should the Architect enforce?

**Options:**

---

- A-** Post-processing of search results is a bad practice that needs to be corrected.
- B-** The transaction for updating of orders needs to be rewritten to avoid problems with transaction size.
- C-** Configure circuit breaker and timeout for the OMS web service call to prevent thread exhaustion.
- D-** Standard order import should be used instead of modifying multiple order objects with custom code.

**Answer:**

---

C

## Question 5

---

**Question Type:** MultipleChoice

---

The Client wishes to implement a third party integration that allows for free shipping if the customer is a member of the third party service. When the customer's order is exported to the Order Management System (OMS) it also creates a custom object in order to track additional data before sending that order data to the third-party service as well.

What technical concern should the Architect raise to protect performance and stability of the site?

**Options:**

---

- A-** The customer order quota and related retention or deletion needs.
- B-** The customer's order data sent to a third-party and related security needs.
- C-** The OMS having order data sent to a third party and related security needs.
- D-** The custom object quota and related retention or deletion needs.

**Answer:**

---

D

## Question 6

---

**Question Type:** MultipleChoice

---

The Client is creating a new Storefront and their requirements include:

- \* ApplePay support
- \* Log -n through a standard OAuth2 social media account
- \* One Okie checkout process
- \* A/B testing for promotions

Which two items require technical documentation for customizing the Storefront Reference Architecture?

Choose 2 answers

**Options:**

---

**A-** One Click checkout process

- B- ApplePay support
- C- log in through a standard OAuth2 social media account
- D- A/B testing for promotions

**Answer:**

---

A, B

## Question 7

---

**Question Type: MultipleChoice**

---

The Client wants to have a flash sale on a few products every day. These products are sold through B2C Commerce as well as an in store Point of Sale system that is tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed will continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product's inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers

**Options:**

---

- A-** The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.
- B-** If the external hosted web-service is unreliable. It could be a point of failure in the site's order placement flow.
- C-** If the product Inventory threshold that triggers the web service calls is reached too often. It will have a negative Impact on site performance.
- D-** Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods

**Answer:**

---

B, C
