- C- ProductSearchModel().getProductSearchHits()
- D- ProductVariantManager.getVariants()

Answer:

C

Question 4

Question Type: MultipleChoice

There are three logging categories: category1, category1.eu, and category1.us.

In Business Manager, category1 is enabled for WARN level and no other categories are configured. All custom log targets are enabled.

The code segment below executes.

```
var logger = Logger.getLogger("loggerFile","category1.eu" );  
logger.warn("This is a log message");
```

What is the result'

Options:

- A- Logs will not be written.
- B- Logs will be written to the log file with a prefix loggerFile.
- C- Logs will be written to the log file with a prefix custom-loggerFile.
- D- Logs will be written to the log file with a prefix customwarn.

Answer:

B

Question 5

Question Type: MultipleChoice

A client has two B2C Commerce sites in the same instance: one for the U.S market, the other for the European market. The products they make are sold with different safety certificates based-on the world location.

For example, they sell a smartphone with certificate A in the U.S and certificate B in Europe, a hairdryer with certificate C in the U.S and certificate D in Europe, and more.

How should a developer allow the merchant to display the appropriate certification logo in the produce to details page, depending on the customer's location?

Options:

- A-** Add a Localizable custom attribute to the Certificate system object type.
- B-** Add an Image custom preference to the SitePreference system object type
- C-** Add a Site-specific custom attribute to the Product system object type.
- D-** Add a Localizable custom preference to the SitePreference system object type.

Answer:

C
