## Question 1

---

**Question Type:** MultipleChoice

---

What is an Access Control List?

### Options:

---

- A- A list of steps necessary for an individual to access a resource.
- B- A list that indicates the type of permission granted to each individual.
- C- A list showing the resources that an individual has permission to access.
- D- A list of individuals who have had their access privileges to a resource revoked.

### Answer:

---

C

## Question 2

---

**Question Type:** MultipleChoice

---

Which is likely to reduce the types of access controls needed within an organization?

**Options:**

---

- A- Decentralization of data.
- B- Regular data inventories.
- C- Standardization of technology.
- D- Increased number of remote employees.

**Answer:**

---

C

## Question 3

---

**Question Type: MultipleChoice**

---

Organizations understand there are aggregation risks associated with the way they process their customer's data

- a. They typically include the details of this aggregation risk in a privacy notice and ask that all customers acknowledge they understand these risks and consent to the processing.

What type of risk response does this notice and consent represent?

**Options:**

---

- A- Risk transfer.
- B- Risk mitigation.
- C- Risk avoidance.
- D- Risk acceptance.

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

What risk is mitigated when routing video traffic through a company's application servers, rather than sending the video traffic directly from one user to another?

**Options:**

---

- A- The user is protected against phishing attacks.
- B- The user's identity is protected from the other user.
- C- The user's approximate physical location is hidden from the other user.
- D- The user is assured that stronger authentication methods have been used.

**Answer:**

---

B

## Question 5

---

**Question Type: MultipleChoice**

---

In day to day interactions with technology, consumers are presented with privacy choices. Which of the following best represents the Privacy by Design (PbD) methodology of letting the user choose a non-zero-sum choice?

**Options:**

---

- A- Using images, words, and contexts to elicit positive feelings that result in proactive behavior, thus eliminating negativity and biases.

**B-** Providing plain-language design choices that elicit privacy-related responses, helping users avoid errors and minimize the negative consequences of errors when they do occur.

**C-** Displaying the percentage of users that chose a particular option, thus enabling the user to choose the most preferred option.

**D-** Using contexts, antecedent events, and other priming concepts to assist the user in making a better privacy choice.

**Answer:**

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

Which of the following would be the most appropriate solution for preventing privacy violations related to information exposure through an error message?

**Options:**

---

**A-** Configuring the environment to use shorter error messages.

**B-** Handling exceptions internally and not displaying errors to the user.

- C-** Creating default error pages or error messages which do not include variable data.
- D-** Logging the session name and necessary parameters once the error occurs to enable trouble shooting.

**Answer:**

---

C

## Question 7

---

**Question Type: MultipleChoice**

---

What logs should an application server retain in order to prevent phishing attacks while minimizing data retention?

**Options:**

---

- A-** Limited-retention, de-identified logs including only metadata.
- B-** Limited-retention, de-identified logs including the links clicked in messages as well as metadata.
- C-** Limited-retention logs including the identity of parties sending and receiving messages as well as metadata.
- D-** Limited-retention logs including the links clicked in messages, the identity of parties sending and receiving them, as well as metadata.

**Answer:**

---

B

## Question 8

---

**Question Type: MultipleChoice**

---

Which of the following modes of interaction often target both people who personally know and are strangers to the attacker?

**Options:**

---

**A-** Spam.

**B-** Phishing.

**C-** Unsolicited sexual imagery.

**D-** Consensually-shared sexual imagery.

**Answer:**

---

B

## Question 9

---

**Question Type:** MultipleChoice

---

A company seeking to hire engineers in Silicon Valley ran an ad campaign targeting women in a specific age range who live in the San Francisco Bay Area.

Which Calo objective privacy harm is likely to result from this campaign?

**Options:**

---

**A-** Lost opportunity.

**B-** Economic loss.

**C-** Loss of liberty.

**D-** Social detriment.

**Answer:**

---

D

## Question 10

---

**Question Type: MultipleChoice**

---

What privacy risk is NOT mitigated by the use of encrypted computation to target and serve online ads?

**Options:**

---

- A-** The ad being served to the user may not be relevant.
- B-** The user's sensitive personal information is used to display targeted ads.
- C-** The personal information used to target ads can be discerned by the server.
- D-** The user's information can be leaked to an advertiser through weak de-identification techniques.

**Answer:**

---

D
