Question 1

Question Type: MultipleChoice

A storage node on your EMC Avamar server has failed, and you are replacing it by using the spare node. What do you do to change the probe.xml node database?

Options:

- A- Delete the entry for the spare node, and replace the failed node's entry with the IP address of the spare
- B- Leave the entry for the spare node in place, and replace the failed node's entry with the IP address of the spare
- C- Leave the entry for the failed node in place, delete the entry for the spare node, and add a new entry that has the IP address of the spare
- D- Leave the entries for the failed node and the spare in place, and add a new entry that has the IP address of the spare

Answer:

A

Question 2

Question Type: MultipleChoice

By default, where are the cache files located on an EMC Avamar Windows backup client?

Options:

- A- C:\Program Files\avs\var
- B- C:\Program Files\avs\var\clientlogs
- C- C:\Program Files\avs\administrator
- D- C:\Program Files\avs\bin

Answer:

A

Question 3

Question Type: MultipleChoice

What is the minimum seek time required to pass the benchmark test of a single-node, 3.3 TB EMC Avamar?

Options:

A- 450 seeks/sec

B- 500 seeks/sec

C- 550 seeks/sec

D- 325 seeks/sec

Answer:

D

Question 4

Question Type: MultipleChoice

What describes the Avamar "benchmark_gen" script?

Options:

A- A perl script that looks for /data* mounts and creates a single shell script benchmark

- B-** An executable that creates a /QA directory within which files are created and read by dt
- C-** A perl script that extracts the summarized dt results
- D-** An executable that performs a random seek, followed by a single read, for a specified number of iterations

Answer:

A

Question 5

Question Type: MultipleChoice

Which Avamar utility modifies the operating system networking files on an Avamar utility node?

Options:

- A-** dpnnetutil
- B-** node.cfg
- C-** nodenumbers
- D-** dpnutils

Answer:

A

Question 6

Question Type: MultipleChoice

Which command is used to configure basic networking on an EMC Avamar node?

Options:

A- dpnnetutil

B- ifconfig

C- netconfig

D- netstat

Answer:

C

Question 7

Question Type: MultipleChoice

What is the result of specifying only one NTP server during an EMC Avamar server software installation?

Options:

- A- The utility node will be used as the secondary time source.
- B- The installation will raise an error and fail.
- C- Only one time source will be used.
- D- A time source will be automatically selected.

Answer:

A

Question 8

Question Type: MultipleChoice

Which command is used to configure basic networking on an EMC Avamar node, prior to the transfer of the EMC Avamar software to it?

Options:

A- netconfig

B- ifconfig

C- ipconfig

D- dpnnetutil

Answer:

A

Question 9

Question Type: MultipleChoice

You need to install a multinode EMC Avamar server. To which node(s) should you copy the Avamar software file?

Options:

- A- Utility node and active data nodes
- B- Utility node only
- C- Utility node, active data nodes, and spare node
- D- Active data nodes only

Answer:

B

Question 10

Question Type: MultipleChoice

You are performing an installation of the EMC Avamar software when you encounter the message "Error: You must place a valid Avamar license key in /usr/local/avamar/etc/license.xml ...". What is the relevance of this message?

Options:

- A- You may fully use the system until the licensing grace period expires.

- B-** You will not be able to use the system at all.
- C-** You will be able to write backup data to the system, but not retrieve that data.
- D-** You may fully use the system, but for a limited amount of backup data only.

Answer:

A

Question 11

Question Type: MultipleChoice

Which EMC Avamar utility is used to configure a multinode server within a NAT environment?

Options:

- A-** netconfig
- B-** ifconfig
- C-** avmaint
- D-** dpnnetutil

Answer:

D
