Question 1

Question Type: MultipleChoice

SAN network-based data replication technology is a storage area network between front-end application servers and back-end storage systems

Network (SAN), adding a layer of intelligent switches, the front end is connected to the server host, and the back end is connected to the storage device.

Options:

A- TRUE

B- FALSE

Answer:

A

Question 2

Question Type: MultipleChoice

What is the correct sequence of the overall reconstruction process?

1. Query all CKGs with CK falling on the faulty disk
2. Assign hot spare CK to all these CKGs
3. Update CKG information and release the reconstructed CK
4. Write the reconstructed data to the hot standby CK
5. Through the RAID algorithm, calculate the data on the failed disk based on the data on the normal disk and the check disk

Options:

A- 1->2->5->4->3

B- 1->2->3->5->4

C- 5->1->2->3->4

D- 5->2->1->4->3

Answer:

A

Question 3

Question Type: MultipleChoice

DAS is a storage architecture without scalability.

Options:

A- TRUE

B- FALSE

Answer:

A

Question 4

Question Type: MultipleChoice

Which of the following is not an IP SAN component?

Options:

A- Storage device with iSCSI interface

B- twisted pair

C- NIC

D- FC switch

Answer:

D

Question 5

Question Type: MultipleChoice

The following two descriptions are correct:

Description 1: Synchronous remote replication, when the primary storage fails, the amount of data lost can be 0.

Description 2: When the host is a Linux-based file system, asynchronous remote replication must be used.

Options:

- A- description 1 and description 2 are correct
- B- Description 1 pair, description 2 wrong
- C- Description 1 wrong, description 2 pairs
- D- description 1 and description 2 are wrong

Answer:

B

Question 6

Question Type: MultipleChoice

Which of the following operating systems can access CIFS shares without installing additional software?

Options:

- A- Win7
- B- Solaris
- C- FreeBSD

D- AIX

Answer:

A

Question 7

Question Type: MultipleChoice

Which of the following RAID levels has the lowest hard disk space utilization?

Options:

A- RAID 0

B- RAID 1

C- RAID 3

D- RAID 5

Answer:

B

Question 8

Question Type: MultipleChoice

Deduplication and compression can only be enabled for Thin LUNs.

Options:

A- TRUE

B- FALSE

Answer:

A

Explanation:

Resolution: Only thin LUN can enable deduplication.

Question 9

Question Type: MultipleChoice

When the RPO time requirement is at the minute level, the traditional tape backup method can be used.

Options:

A- TRUE

B- FALSE

Answer:

B

Question 10

Question Type: MultipleChoice

When the RTO requirement is within 10 minutes, the traditional tape backup method is not recommended.

Options:

A- TRUE

B- FALSE

Answer:

A

Question 11

Question Type: MultipleChoice

FTP is a very secure protocol with no security risks.

Options:

A- TRUE

B- FALSE

Answer:

B
